Here's what your cat really means with a 'Meow' - New York Post

The Secret Language Of Cats - Peter Kuras 2018-11-01

Have you ever wondered what your cat is saying? Cats do not meow randomly, nor do they growl or hiss because they have nothing better to do. Cat sounds have a purpose, and they can carry important messages, whether for us or other cats. Susanne Schötz is hard at work on breaking the cat code. She is a professor at Lund University in Sweden, where a longstanding research program is proving that cats do actually use vocal communication — with each other and with their human caretakers. Understanding the vocal strategies used in human-cat communication will have profound implications for how we communicate with our pets, and has the potential to improve the relationship between animals and humans within several fields, including animal therapy, veterinary

medicine and animal sheltering. In *The Secret Language of Cats*, Schötz offers a crash course in cat phonetics. She introduces us to the full range of feline vocalisations, explains what they can mean in different situations and gives practical tips to help us understand our cats better.

Whether your team cat or team dog, we can all agree that cats are the less-understood of the two pets. However, unlike dogs, cats are more calculated with their affection, meaning that in order to decode their every move, you must be paying attention. The Secret Language of Cats

- Heather Dunphy 2011

This book shows how to interpret what our felines are telling us, and explains how they, in turn, interpret our body language and attempts to communicate with them.

your cat a happier, more sociable animal. The idea of a trained cat is a contradiction in terms, isn't it? Naturally solitary, wary, easily threatened by newcomers, they are attached to place rather than people, and much of their 'antisocial' behaviour arises in situations where that attachment is threatened. But, as cat experts Sarah Ellis and John Bradshaw argue, such stress-induced behaviour can be prevented, reduced, even eliminated, by training. A comprehensive and engaging step-by-step guide, *The Trainable Cat* will help you to help your cat negotiate the complexities of everyday life: to enjoy living with humans - including new babies and lively toddlers - and other pets; to answer to their name; settle into a new home; and to overcome the anxiety of a visit to the vet. You can train your cat to do what is in its own best interests - even when its instincts tell it otherwise.
