While many reference books on spices include alphabetized descriptions, the similarity between this book and others ends there. More than just a list of spices, this book covers each spice's varieties, forms, and the chemical components that typify its flavor and color. The author includes a description of spice properties, both chemical and sensory, and the culinary information that will aid in product development. She also explains how each spice is used around the world, lists the popular global spice blends that contain the spice, describes each spice's folklore and traditional medicine usage, and provides translations of each spice's name in global languages. New to this edition is coverage of spice labeling and a chapter on commercial seasoning formulas. Going beyond the scope of most spice books, this reference describes ingredients found among the world's cuisines that are essential in providing flavors, textures, colors, and nutritional value to foods. It explores how these

ingredients are commonly used with spices to create authentic or new flavors. The author has created a complete reference book that includes traditionally popular spices and flavorings as well as those that are emerging in the US to create authentic or fusion products. Designed to help you meet the challenges and demands of today's dynamic marketplace, this book is a complete guide to developing and marketing successful products.

belongs, this novel is (quite fittingly) spellbinding.”—JODI PICOULT, author of *Wish You Were Here* A deeply atmospheric story about ancestral magic, an unsolved murder, and a second chance at true love **ONE OF THE BEST BOOKS OF THE YEAR:** She Reads Emery Blackwood’s life changed forever the night her best friend was found dead and the love of her life, August Salt, was accused of murdering her. Years later, she is doing what her teenage self swore she never would: living a quiet existence on the misty, remote shores of Saoirse Island and running the family’s business, Blackwood’s Tea Shoppe Herbal Tonics & Tea Leaf Readings. But when the island, rooted in folklore and magic, begins to show signs of strange happenings, Emery knows that something is coming. The morning she wakes to find that every single tree on Saoirse has turned color in a single night, August returns for the first time in fourteen years and unearths the past that the town has tried desperately to forget.

August knows he is not welcome on Saoirse, not after the night everything changed. As a fire raged on at the Salt family orchard, Lily Morgan was found dead in the dark woods, shaking the bedrock of their tight-knit community and branding August a murderer. When he returns to bury his mother’s ashes, he must confront the people who turned their backs on him and face the one wound from his past that has never healed—Emery. But the town has more than one reason to want August gone, and the emergence of deep betrayals and hidden promises spanning generations threaten to reveal the truth behind Lily’s mysterious death once and for all.

"Let food be your medicine, medicine your food."- Hippocrates, 2400 B.C. With over 50,000 distinct species in sub-Saharan Africa alone, the African continent is endowed with an enormous wealth of plant resources. While more than 25 percent of known species have been used for several centuries in traditional African medicine for the prevention and treatment of diseases, Africa remains a minor player in the global natural products market largely due to lack of practical information. This updated and expanded second edition of the Handbook of African Medicinal Plants provides a comprehensive review of more than 2,000 species of plants employed in indigenous African medicine, with full-color photographs and references from over 1,100 publications. The first part of the book contains a catalog of the plants used as ingredients for the preparation of traditional remedies, including their medicinal uses and the parts of the plant used. This is followed by a pharmacognostical profile of 170 of the major herbs, with a brief description of the

diagnostic features of the leaves, flowers, and fruits and monographs with botanical names, common names, synonyms, African names, habitat and distribution, ethnomedicinal uses, chemical constituents, and reported pharmacological activity. The second part of the book provides an introduction to African traditional medicine, outlining African cosmology and beliefs as they relate to healing and the use of herbs, health foods, and medicinal plants. This book presents scientific documentation of the correlation between the observed folk use and demonstrable biological activity, as well as the characterized constituents of the plants.

disapproving glare. And he never, ever socialises with his co-workers. This is why Maisie Wilkins, happy-go-lucky ray of sunshine, can't fathom why Cameron finally decided to show up at their annual office Christmas party. Every year he received an invite, and every year he failed to attend. But not this year. Curious as to why he's there, Maisie can't resist sitting next to Cameron. Before she knows it, she's had one too many drinks and is drunkenly hailing a cab back to his place. Office party flings are not something she normally does, but despite his intimidating character, Cameron has a charm she can't resist. Or maybe it was just those five gin and tonics blurring her judgement. Whatever the reason, Maisie now has to navigate the awkward, tension filled waters of sharing an office with someone she's slept with.

Watching the English - Kate Fox 2005-04-11

In "Watching The English" anthropologist Kate Fox takes a revealing look at the quirks, habits and foibles of the English people. She puts the English national character under her anthropological microscope, and finds a strange and fascinating culture, governed by complex sets of unspoken rules and byzantine codes of behaviour. The rules of weather-speak. The ironic-gnome rule. The reflex apology rule. The paranoid-pantomime rule. Class indicators and class anxiety tests. The money-talk taboo and many more ...Through a mixture of anthropological analysis and her own unorthodox experiments (using herself as a reluctant guinea-pig), Kate Fox discovers what these unwritten behaviour codes tell us about Englishness.
