Gender and Migraine - Antoinette Maassen van den Brink 2019-02-14

This book focuses on the influence of sex and gender in migraine, presenting new insights in basic science as well as their clinical relevance. As migraine is roughly three times more common in women than in men, and also highly depends on hormonal milestones – such as menarche, menstruation, pregnancy and menopause – particular

attention is devoted to the role of female sex hormones in this disease. The first chapters present general data on gender-related differences in migraine such as epidemiology, comorbidities and related risks. Furthermore, while several chapters focus on the role of female sex hormones in migraine-triggering mechanisms at a basic scientific level (e.g. cranial circulation), ample attention is also paid to the clinical relevance of such mechanisms and to the best clinical treatment for migraine patients. As the first book entirely devoted to this topic, it will be of interest to researchers and practitioners in the fields of neurology, internal medicine, endocrinology, physiology and pharmacology.

Using the Maintenance of Certification (MOC) and American Board of Internal Medicine blueprints for examination development, authors provide evidence-based reviews with several challenge questions and annotated answers at the end of each chapter. The epidemiology, pathophysiology, evaluation, diagnosis, treatment, and prognosis of all disease processes are detailed in each chapter. Learning objectives, summary points, certain exam techniques, clinical pearls, diagrams, and images are added to enhance reader's engagement and understanding of the material. [Why Women Have Sex](#) - Cindy Meston 2010

WOMEN'S STUDIES. Why do women have sex? Is it purely for pleasure or the desire to reproduce? Cindy Meston and David Buss investigate the underlying sexual desires of women and identify 237 distinct motivations for sex. Drawing on more than a thousand intensive interviews conducted solely for the book, as well as their pioneering research on physiological response and evolutionary emotions, Meston and Buss give us a remarkably complex and nuanced portrait of female sexuality. They explore the use of sex as a defensive tactic against a man's infidelity (protection), as a ploy to boost self-confidence (status), as a barter for gifts (resource acquisition), or even as a cure for a headache

(medication). "Why Women Have Sex" explores the deep-seated psychology and biology of female sexuality, and promises to inform every woman's - and her partner's - awareness of her relationship to sex and her own sexuality.
