**Things Fall Away** - Neferti X. M. Tadiar 2009-04-24

In *Things Fall Away*, Neferti X. M. Tadiar offers a new paradigm for understanding politics and globalization. Her analysis illuminates both the power of Filipino subaltern experience to shape social and economic realities and the critical role of the nation's writers and poets in that process. Through close readings of poems, short stories, and novels brought into conversation with scholarship in anthropology, sociology, politics, and economics, Tadiar demonstrates how the devalued experiences of the Philippines' vast subaltern populations—experiences that “fall away” from the attention of mainstream and progressive accounts of the global capitalist present—help to create the material conditions of social life that feminists, urban activists, and revolutionaries seek to transform. Reading these “fallout” experiences as vital yet overlooked forms of political agency, Tadiar offers a new and provocative analysis of the unrecognized productive forces at work in global trends such as the growth of migrant domestic labor, the emergence of postcolonial “civil society,” and the “democratization” of formerly authoritarian nations. Tadiar treats the historical experiences articulated in feminist, urban protest, and revolutionary literatures of the 1960s–90s as “cultural software” for the transformation of dominant social relations. She considers feminist literature in relation to the feminization of labor in the 1970s, when between 300,000 and 500,000 prostitutes were working in the areas around U.S. military bases, and in the 1980s and 1990s, when more than five million Filipinas left the country to toil as maids, nannies, nurses, and sex workers. She reads urban protest literature in relation to authoritarian modernization and crony capitalism, and she reevaluates revolutionary literature's constructions of the heroic revolutionary subject and the messianic masses, probing these social movements' unexhausted cultural resources for radical change.

*Manila Demon* - Thomas Maul 2012-02-27

*Coming Out of the Confessional to Be Part of the Congregation and Eucharist: How LGBTQ+ Members*

*Have Used Liberation Theology and Queer Theory to Gain Acceptance in Society and the Church* - Anthony J. Mesa 2022

The purpose of this critical discourse analysis is to understand how the LGBTQ+ members have gained acceptance within the Catholic Church. Although discourse about Liberation Theology and Queer Theory has been taking place for quite some time, it has only been in the last couple of decades that the conversation has come to the forefront of discussion in all scopes of society: private, public, and religious. However, very little research and publications have been done that focus on how Liberation Theology and Queer Theory have been used by members of the society in order to advocate for acceptance and to welcome into Church the lesbian, gay, bisexual, trans, questioning/queer, plus ("LGBTQ+") members. As we all know, the 1960s was a decade of political and social unrest across the world. In the United States, we had the civil rights movement, Vietnam War, and the assassinations of US President John F. Kennedy and civil rights leader Dr. Martin Luther King, Jr. Latin American in the 1960s also had its share for social unrest amongst peasants and laborer over unequal distribution of wealth and social injustices. Latin America saw the triumph of the Cuban Revolution, the spreads of guerrilla movements, and the creation of youth counterculture which spread into students, women, and indigenous social movements. Latin America also had a literary explosion with young writers who challenged the Latin American writing conventions and focused on historical political oppression as well as cultural concepts such as magical realism to find their own cultural and literary autonomy. Latin American countries also saw great political unrest that stemmed from their students who were organizing and demanding better government and representation for all. Such as the cases in Mexico with the well known massacre of Tlatelolco where the Mexican military open fire and murdered countless students who were protesting. The Catholic Church also had major changes that affected all of its parishioners worldwide. In 1962, the Catholic Church held its first meeting of the Second Ecumenical Council of the Vatican, commonly known as the Second Vatican Council or Vatican II, since Pope John XXIII claimed the church doctrine and practices needed "updating" and "improvements"; and, its teaching needed to be presented in a way that would appear relevant and understandable to the masses. Among the most important changes the Second Vatican established was with the liturgy, canon law, *Dignitatis humanae*, and ecumenism. The Second Vatican adopted the concept that all liturgy was to be read in "vernacular language" especially the scripture readings at mass. Prior to this change, mass was spoken in Latin internationally whether mass was held in the United States, Latin America, or France. Since the Second Vatican, mass spoken in the local languages that is understood by the parishioners. As such, we now have masses in English, Spanish, Tagalog, or Vietnamese in greater Los Angeles area. As per *Dignitatis humanae*, the Second Vatican declared that all people have the right to religious freedom. This declaration helped to give birth to many arguments regarding faith and the teaching of the Catholic Church within the Church itself as well as in societies. In Latin American, some religious leaders took the arguments of the Second Vatican and religious scriptures in order to help the poor and oppressed through social and political movements and civic affairs. These church leaders held the believe that the Church should be actively involved in improving the lives of the poor. The Liberation Theology movements is dated to the Latin American Bishops' Conference of 1968 that was held in Medellin, Colombia. The lesbian, gay, bisexual, transgender ("LGBT") movement also came out of the 1960s sexual revolution and social movement in the United States demanding equality. The initial political goals of the LGBT movement was change laws and policies in order to gain basic rights and protections from harm. The movement wanted the discriminatory laws and policies for public accommodations, employment, and housing to be removed from the books. The LGBT community were constantly harassed by the police and other law enforcement agents. For example, police officers had the right to go to an establishment that catered to the LGBT community and make arrests at will even if there were no disturbance prior to the

police arrival. Once arrested, the LGBT members faced possible employment loss, eviction from their homes, and high fines. These police raids lead to many protests; and, in 1967 the LGBT members and their supporters held demonstrations after the Los Angeles Police Department ("LAPD") raided the Black Cat Tavern and New Faces. These demonstrations brought national attention and in 1969 the Stonewall Riots in New York City help to solidify the public opinion that LGBT members were part of the society and they were not going anywhere. Queer Theory grows out of other contextual theologies like liberation and feminist theologies as well as the social science based queer theory. Queer theology aims to shed light on underserved and theologically underrepresented groups of people, namely members of the lesbian, gay, bisexual, trans, questioning/queer, plus ("LGBTQ+"). Furthermore, in queer theology, just as feminist theologies and liberation theologies, the work done is important to all Christians and not just queer Christians. This thesis proposes an interdisciplinary analysis of social movement and politics of Liberation Theology and Queer Theory in Latin America in order to analyze how the lesbian, gay, bisexual, trans, questioning/queer, plus ("LGBTQ+") community within the Catholic Church has been able to find a voice within the church for decades while the official stance from the Catholic Church has been to silence or against the LGBTQ+ community. This thesis sheds light on the relationship among religious and political experiences and views in the public and personal spheres. I approach the dual themes of historical memory and silence as conceptual bridges through which to trace the connections of the religious and political disruption in order to acknowledge the LGBTQ+ community and to embrace it as part of the larger Catholic church/family. The study will highlight the historical stance different Popes have taken from the Second Vatican to the present vis-a-vis LGBTQ+ supporters who are religious leaders within the Catholic Church. The three research questions that will guide this study are (1) How does analyzing Liberation Theology show that the Catholic Church as an institution to benefit the LGBTQ+ communities?, (2) How does Liberation Theology and Queer Theory/Liberation Movement and social movement influence the Catholic Church to become more welcoming of its LGBTQ+ members?; and, (3) How do religious beliefs influence political/social consciousness to embrace Theology of Liberation within the community in order to be accepted within the Catholic Church. This thesis will include peer reviewed articles, Vatican documents, and other publications in order to document and analyze how Liberation Theology and Queer Theology have been used by members of the LGBTQ+ in order to advocate and gain acceptance within the Catholic Church and the public sphere.

#### **How Far is America From Here?** - 2005-01-01

How Far is America From Here? approaches American nations and cultures from a comparative and interdisciplinary perspective. It is very much at the heart of this comparative agenda that "America" be considered as a hemispheric and global matter. It discusses American identities relationally, whether the relations under discussion operate within the borders of the United States, throughout the Americas, and/or worldwide. The various articles here gathered interrogate the very notion of "America": which, whose America, when, why now, how? What is meant by "far"—distance, discursive formations, ideals and ideologies, foundational narratives, political conformities, aberrations, inconsistencies? Where is here—positionality, geographies, spatial compressions, hegemonic and subaltern loci, disciplinary formations, reflexes and reflexivities? These questions are addressed with regard to the multiple Americas within the USA and the bi-continental western hemisphere, as part of and beyond inter-American cultural relations, ethnicities across the national and cultural plurality of America, mutual constructions of North and South, borderlands, issues of migration and diaspora. The larger contexts of globalization and America's role within this process are also discussed, alongside issues of geographical exploration, capital expansion, integration, transculturalism, transnationalism and global flows, pre-Columbian and contemporary Native American cultures, the Atlantic slave trade, the environmental crisis, U.S. literature in relation to Canadian or Latin American literature, religious conflict both within the Americas and between the Americas and the rest of the world, with such issues as American Zionism, American exceptionalism, and the discourse of/on terror and terrorism.

#### *Wild Grapes and Rattlesnakes* - George Cullinen 2004

Wild Grapes and Rattlesnakes chronicles the extraordinary life and times of George Cullinen, Spanish Civil War veteran, union organizer and anti-war activist. Unlike other Spanish Civil War veterans such as George Orwell and Arthur Koestler, Cullinen's devotion to the cause of the Spanish Republic never wavered, even when the trauma of shell shock finally drove him from the battlefield. In this evocative memoir, Cullinen recounts the events in his life before, during and after the war, offering wry insights into the forces that shaped the history of the last century, with Spain as a cruel microcosm for the global struggle against Fascism that was yet to come. Cullinen recalls his youthful follies growing up in the Pacific Northwest as a rough and tumble prelude to his political radicalization in the years following World War I. While still in his teens, he became a merchant seaman and at one point, hoping to create a new life for himself, he jumped ship in Japan, only to be apprehended and deported. Other early adventures include his riding the rails during the Depression, working for the Civilian Conservation Corps, and fighting for the rights of fellow seaman on the waterfront. In later years, as an educator and filmmaker, he devoted his life to the cause of world peace. While fierce in his beliefs and driven by an inflamed social conscience, Cullinen tells his tale with compassion, humility, and self-effacing humor.

"This report documents the range of abuses against lesbian, gay, bisexual, and transgender (LGBT) students in secondary school. It details widespread bullying and harassment, discriminatory policies and practices, and an absence of supportive resources that undermine the right to education under international law and put LGBT youth at risk"--Publisher's description.

#### *Diagnostic and Statistical Manual of Mental Disorders (DSM-5)* - American Psychiatric Association 2021-09-24

#### *Transgender Medicine* - Leonid Poretsky 2019-02-22

Although transgender persons have been present in various societies throughout human history, it is only during the last several years that they have become widely acknowledged in our society and their right to quality medical care has been established. In the United States, endocrinologists have been providing hormonal therapy for transgender individuals for decades; however, until recently, there has been only limited literature on this subject, and non-endocrine aspects of medical care for transgender individual have not been well addressed in the endocrine literature. The goal of this volume is not only to address the latest in hormonal therapy for transgender individuals (including pediatric and geriatric age groups), but also to familiarize the reader with other aspects of transgender care, including primary and surgical care, fertility preservation, and the management of HIV infection. In addition to medical issues, psychological, social, ethical and legal issues pertinent to transgender individuals add to the complexities of successful treatment of these patients. A final chapter includes extensive additional resources for both transgender patients and providers. Thus, an endocrinologist providing care to a transgender person will be able to use this single resource to address most of the patient's needs. While Transgender Medicine is intended primarily for endocrinologists, this book will be also useful to primary care physicians, surgeons providing gender-confirming procedures, mental health professionals participating in the care of transgender

persons, and medical residents and students.

### **Queer Bangkok -** Peter A. Jackson 2011-03-01

The Thai capital Bangkok is the unrivalled centre of the country's gay, lesbian and transgender communities. These communities are among the largest in Southeast Asia, and indeed in the world, and have a diversity, social presence and historical depth that set them apart from the queer cultures of many neighbouring societies. The first years of the 21st Century have marked a significant transition moment for all of Thailand's LGBT cultures, with a multidimensional expansion in the geographical extent, media presence, economic importance, political impact, social standing, and cultural relevance of Thai queer communities. This book analyzes the roles of the market and media - especially cinema and the Internet - in these transformations, and considers the ambiguous consequences that the growing commodification and mediatisation of queer lives have had for LGBT rights in Thailand. A key finding is that in the early 21st Century processes of global queering are leading to a growing Asianisation of Bangkok's queer cultures. This book traces Bangkok's emergence as a central focus of an expanding regional network linking gay, lesbian and transgender communities in Hong Kong, Singapore, Taiwan, Indonesia, the Philippines and other rapidly developing East and Southeast Asian societies. Peter A. Jackson is associate professor in the School of Culture, History and Language at Australian National University. "The myriad faces of Thai gender/sexuality culture have been an attraction for both pleasure-seekers and researchers/scholars/activists. Exploring the rapidly changing LGBT cultures and Thai queer identities, the essays collected here provide insightful analyses of historical continuities as well as developing variations within the highly complex erotic/economic texture of Thai society. A must-read for anyone in the booming field of gender/sexuality studies." -Josephine Ho, Chair Professor, Center for the Study of Sexualities, National Central University, Taiwan

### **Remembering Conquest -** Nantawan B Lewis 2014-01-02

Remembering Conquest: Feminist/Womanist Perspectives on Religion, Colonization, and Sexual Violence

addresses the issue of sexual violence against women from feminist and womanist theological perspectives. Taken from proceedings of a panel discussion at the 1998 annual meeting of the American Academy of Religion, this informative book offers sociologists, clergy, and women an examination of how negative stereotypes in society are derived from Christian perspectives and other religions. Exploring abuse against Native American, African-American, Filipino, and Thai women, Remembering Conquest will help you recognize the combination of issues that lead to violence against women. Thorough and compelling, this valuable book will urge you to advocate for change in how religious groups interpret women so that religion can provide a moral and ethical source of equality for women instead of a social barrier. This intelligent book will help you understand the changes that need to be made as you read about numerous atrocities, including: the history of violence experienced by American Indian women during colonization and realizing that prior to this time, sexual violence did not exist in American Indian societies how the United States' colonization of Thailand is directly related to sexual violence today against women, which is expressed in the form of the booming sex industry as well as the AIDS epidemic how poverty in the Philippines has made women and children second-class citizens who must make the ultimate sacrifice and sell their bodies and their souls to survive Remembering Conquest provides you with a unique religious perspective on the subject of violence against women to enlighten you as to how religion can unknowingly help or hinder a woman's healing. You will discover how to assist religious communities in rediscovering new interpretations of their faith traditions and become a moral and ethical source of liberation for women, such as holding perpetrators of abuse responsible for their actions and not insinuating that the abuse victim needs to be "helped" by religion in some way. Compelling and informative, Remembering Conquest provides you with ideas to help bring healing and power to women who are suffering injustices by reinterpreting faith traditions.

### **Global LGBTQ Activism -** Paromita Pain 2023-09-29

Focused on understanding and analyzing LGBTQ activism and protest globally, this edited collection brings together voices from different parts of the world to examine LGBTQ protests and their impact. Through the lens of media, culture, and sociopolitical structures, this collection highlights how cultural and technical factors like the emergence of social media and other digital platforms have impacted LGBTQ activism. This book draws on studies from countries as varied as Zimbabwe, Bangladesh, Sri Lanka, Hungary, Morocco, China, and the US. The contributions provide important insight into how social media and digital platforms have provided space for self-expression and protest and encouraged advocacy and empowerment for LGBTQ movements. It also examines the diversity and similarities between different national contexts and the various obstacles faced, while spotlighting countries that are traditionally understudied in Western academia, in an important step toward decolonizing research. Each chapter, through the voices of activists and media scholars, moves beyond an oversimplified examination of queer protests to show, in rich detail, the exciting yet complicated terrain of queer protests throughout the globe. This book is suitable for media, communication, and cultural studies students; researchers; academics; and LGBTQ activists, as well as students and scholars from related academic disciplines.
