[Negotiating Identity](#) - Anne Helene Thelle
 2014-05-21

Nakagami Kenji is today regarded as one of the most important and influential Japanese post-war writers. Born in 1946 in the burakumin ghetto of the small coastal town of Shingu in southern Wakayama prefecture, Nakagami sailed up as a rising star on the literary skies in the mid-seventies when he became the first writer born after the Second World War to win the prestigious Akutagawa prize. He was also the first writer of the burakumin background to receive wide literary acclaim and recognition from critics and from the literary establishment. The reception of Nakagami's literature has placed him simultaneously both at the avant-garde of modern Japanese literature and near the nostalgic roots of Japan's literary origins. For while his engagement with the Japanese traditional narrative, the monogatari does indeed often seem to bring him disturbingly close to an almost reactionary nostalgia, fissures in his narrative - both in voice, structure, and theme - will at the same time dismantle this nostalgic return. Focusing on one novel, Nakagami's masterpiece *Kiseki* (Miracles) from 1989, this study traces his pendulous movement from nostalgia to avant-garde and back again. At the heart of the study lies the concept of negotiation - a negotiation of cultures, languages, and borders. Nakagami is a minority writing against the constraints of a language and literature that has throughout history contributed to the discrimination of his minority group. Facing this challenge head on, Nakagami engages the literary genres that lie at the root of this discrimination, thus laying bare the difficulties facing anyone trying to break free of

the bonds of culture, history, and literature.

[Brandwashed](#) - Martin Lindstrom 2012-01-03
 Marketing visionary Martin Lindstrom has been on the front line of the branding for over twenty years. In *Brandwashed*, he turns the spotlight on his own industry, drawing on all he has witnessed behind closed doors, exposing for the first time the full extent of the psychological tricks and traps that companies devise to win our hard-earned money. Lindstrom reveals eye opening details such as how advertisers and marketers target children at an alarmingly young age (starting when they are still in the womb), what heterosexual men really think about when they see sexually provocative advertising, how marketers and retailers stoke the flames of public panic and capitalize on paranoia over diseases, extreme weather events, and food contamination scares. It also presents the first ever evidence to prove how addicted we are to our smartphones, and how certain companies (like the maker of a very popular lip balm), purposely adjust their formulas in order to make their products chemically addictive, and much, much more. *Brandwashed* is a shocking insider's look at how today's global giants conspire to obscure the truth and manipulate our minds, all in service of persuading us to buy.

Adam's Nose, And The Making Of**Humankind** - Michael Stoddart 2015-02-12

This book is about the evolution of the sense of smell, from its bacterial origin 3.4 billion years ago, to today's modern, sophisticated humans with an insatiable appetite for perfumes and fragrances. It explains how smell works and how animals sense the environment. The relationship between sex and smell drives much of animal behaviour, and the significance of the human loss of the vomeronasal organ — a part of the sense of smell in animals that responds to sex smells — is identified as a seminal event in the making of humankind. Humans are far more than animals, however, and Adam's Nose explores incense and perfumes, as well as the odour imagery in art, literature and poetry. It is written for readers interested in what makes us human, and does not presuppose a high level of scientific understanding. The text is comprehensive and provides key references to the relevant scientific literature. The book will appeal to scientists and students in a range of biological disciplines, including human evolution, anthropology, olfactory communication, animal behaviour, perfumery and aromatherapy.

This leads to the main question of this research, which is how people respond to the sexual appeals in advertisements and how it affects their purchasing behavior. To answer this question, the author is going to analyze the market of Bruno Banani products and customer needs. Several studies already concluded that using sexual appeals seems to be most effective when sexuality is related to the product itself.

The Erotic History of Advertising - Tom Reichert
2010-04-06

...a number of fascinating anecdotes...well-

documented and fully illustrated...an interesting study in excess and American values. -Blue Ridge Business Journal...explores [sex in advertising] with zest, acuity, and almost suppressed humor...engagingly informative...sparkling social history.- ForeWord...will satisfy the standards of professionalsàacademic or commercial...This is obligatory stuff for anybody in the business...a delightfully provocative read for anyone who is the target of advertisingùanyone, today, who is not actually serving life tenure in a monastery.ö-Baltimore SunVictoria's Secret and Calvin Klein are brand names practically synonymous with sexually suggestive advertising. Considering their high public profile and huge profits, anyone can see that sex sells. Despite polls indicating that the public would like to see less sex in advertising, Americans don't mean what they say. They continue to respond to the lure of provocative marketing and, most important to business, they buy. Knowing this, more and more advertisers are testing the limits of public taste in the highly competitive battle to capture the consumer's attention.All of this is well documented in Tom Reichert's profusely illustrated book, *The Erotic History of Advertising*. As Reichert amply demonstrates, the use of sex in advertising is far from being a recent fad. As long ago as the 1880s, Duke Cigarettes enclosed in their packs--not baseball cards--but similar small cards showing scantily clad women of the stage, which encouraged purchasers to keep buying to complete the whole set. In the 1920s Woodbury soap became the market leader largely through ads with images of romantic situations and claims that Woodbury soap made a woman's skin irresistible to the touch. In the 1930s White Owl cigars had great success in marketing through ads showing attractive couples locked in a passionate kiss, suggesting that only White Owls left the breath smelling pleasant. Warner Lambert capitalized on the same kind of imagery for decades to connect Listerine mouthwash with romantic success.With numerous illustrations showing many erotic ads--some campy, some esthetically elegant, some homoerotic--that push the boundaries of sexuality and taste from over a century of product marketing, Reichert not only tracks the history of sex in advertising but also

explores the many factors that make the link between sex and our consumer culture so successful. Among other things, he considers the range of salacious imagery, from mildly suggestive to the use of outright nudity; the emotional impact of sexy ads; the influence of sex on brand recognition; what works and what doesn't; the differences between male and female responses; and the possible harms of using sex in advertising, especially in regard to young audiences and the perpetuation of female stereotypes. This thoughtful, enjoyable, and fascinating look into the world of advertising--from the late 1800s to the most erotic ads of today--will appeal to both media-savvy consumers and aficionados of pop culture. Tom Reichert, Ph.D., an Advertising Professor at the University of Alabama, has dedicated ten years to studying the prevalence of sex in advertising and its effect on persuasion. He has published on this topic in many scholarly journals, is a contributor to the Encyclopedia of Advertising, and is the lead editor and a contributor to *Sex in Advertising: Perspectives on the Erotic Appeal*.

The Little Book of Perfumes - Luca Turin

2011-11-03

In *Perfumes*, Luca Turin and Tania Sanchez reviewed nearly 1,500 fragrances in their witty, irreverent and innovative handbook - separating the divine from the good from the monumentally awful. Here in *The Little Book of Perfumes* the authors choose their 100 greatest fragrances of all time. Some are very famous, some hardly known, for women and men. There is Jicky (1889), unisex coeval of the Eiffel Tower and 'a towering masterpiece'; Chanel's No. 5 (1921), perhaps the world's most famous perfume, 'stretching deliciously like a sleepy panther'; Knize Ten which 'everyone should own because there is only one like it' and White Linen (1978), 'a canonical expression of the American ideal of sex appeal'. This is a perfect gift, a perfect browse.

'I've long wished perfumery to be taken seriously as an art, and for scent critics to be as fierce as opera critics, and for the wearers of certain "fragrances" to be hissed in public, while others are cheered. This year has brought *Perfumes: The Guide* by Luca Turin and Tania Sanchez, which I breathed in, rather than read, in one delighted gulp.' Hilary Mantel, *Guardian*

Perfumes: The Guide is the culmination of Turin's lifelong obsession and rare scientific flair and Sanchez's stylish and devoted blogging about every scent that she's ever loved and loathed. Together they make a fine and utterly persuasive argument for the unrecognised craft of perfume-making. Perfume writing has certainly never been this honest, compelling or downright entertaining.

Kiss of a Duke - Erica Ridley 2018-11-06
