The Facts of Life Roy Porter 1995 This remarkable study presents the first detailed and scholarly analysis of the creation of sexual knowledge in Britain. Surveying the period between the mid-seventeenth and the mid-twentieth centuries, it examines the major texts which established and authorised sexual knowledge and sexual practices. Porter and Hall then explore the various kinds of backgroundssexual, moral, religious, scientific, medical, domestic, social and cultural - without which these texts are unintelligible. And they examine their authors (some famous, some obscure, some anonymous), their careers, and the motives for involvement in medico-moral campaigns that were often thought unsavoury and commonly led to criticism and censure. The Facts of Life also assesses the wider impact of the publication of sexual knowledge and especially of sex advice literature, and explores the interplay between expertise, therapy, social mores and behaviour. Chapters on the nineteenth and twentieth centuries discuss prostitution, contagious diseases and gender relations, and consider debates on sexual issues and associated revelations of personal experience.

Parents, Children, and the Facts of Life Henry V. Sattler 1952 Father Sattler has written *Parents, Children and the Facts of Life* to help parents fulfill the extremely important duty of training boys and girls to be pure and innocent, and eventually to enter marriage with a noble and holy purpose if God calls them to that state of life. According to the official Catholic teaching, sex education is the duty of the parents, yet many parents still struggle to convey the facts of life to their children in a natural and inspiring way. Applying traditional Catholic principles to very practical questions, Fr. Sattler explains what parents should tell their children, when and how they should tell it, what moral and psychological dangers they must avoid, and what questions they should anticipate. His conversational and down to earth style provides parents with the confidence and practical wisdom to fulfill

their role as their children's primary teachers of the facts of life.

Presided over by an indomitable matriach, the sisters live out a tangled and fraught life that takes them through the Blitz, war work and on into the hopeful postwar years, and a bizarre interlude for one of them in a commune. Barefaced Nyssa Everhart 2019-07-15 An educational, sex-positive card game that helps normalize conversations about sex and sexuality.

The Facts of Life, the Sex Instruction of Ontario Public School Children, 1900-1950 Christabelle Laura Sethna 1995 During 1900 to 1950 a broad and uneasy coalition of sex reformers--educators, physicians, feminists, sexologists, social workers and public health officials--who identified themselves with the social purity movement prior to the First World War and then with the social hygiene movement after 1918 raised their voices in

favour of incorporating sex instruction into Ontario public elementary and secondary schools. The impetus for children's school-based sex instruction was the moral and medical threat posed by what was perceived to be the dreaded corollary of prostitution and the double standard of sexual morality: venereal disease. Sex reformers' discourse on incorporating sex instruction into Ontario public elementary and secondary schools would peak in intensity as venereal disease rates in the civilian and military populations rose co-incident with the First and Second World Wars. This study argues that first, children's sex instruction--variously labelled purity education, sex hygiene, social hygiene, sex education, eugenical instruction and family life education--was heavily influenced by the paternalism, classism and racism of the social purity movement as it came to be constituted after 1885. Second, even when supervised by the social hygiene movement after the Great War, children's sex instruction was predicated upon the post-1885 social purity movement's emphasis on the moral approach to sex reform. This moral approach involved a two-fold undertaking: training the child's will in favour of sexual self-control and imparting rudimentary information on sexual physiology. Third, children's sex instruction was rationalized by the post-1885 social purity movements invoking of three spectres of child-life familiar to middle-class child savers: the child ignorant of sexual matters, the feeble-minded child and the juvenile delinquent. Classed, gendered, racialized and sexualized, these spectres served as "poison containers" or receptacles into which sex reformers poured their anxieties over venereal disease, thus allowing them to conveniently ignore the societal inequalities which contributed to the spread of the malady. As such, between 1900 and 1950, sex instruction, or what British sexologist Havelock Ellis termed "the instruction of children in the essential facts of life," had less to do with teaching children about sexual anatomy, biology, physiology and psychology and much more to do with channelling Canadians toward compulsory heterosexuality, reproducing the patriarchal nuclear family, maintaining the hegemony of the Anglo-Saxon race, building a healthy, patriotic citizenry and protecting the nation state from harm.

The Real Facts Of Life Margaret Jackson 2005-08-04 During the last twenty years feminist research into the history of sexuality has made important contributions to the theoretical understanding of the relationship between sexuality and male power. When sexology became established as a science, feminists had for many years been engaged in a struggle to change male sexuality, by waging campaigns against male sexual violence and abuse of women and children; by challenging the institutions of marriage and prostitution; and by asserting in theory and in practice the right to female sexual autonomy. Despite the excellent research published in this important and fascinating aspect of feminist history, there are still gaps in our knowledge.; "The Real Facts of Life" aims to fill these gaps: Why and when did sexuality become an important political issue for the 19th century feminist?; What was the history of campaigns against double standards of sexual morality?; Why were feminists so divided in their views about sexual freedom and its relationship to women's emancipation? The analysis of these issues illuminates past and present feminists' ideas and theories about sexuality. Margaret Jackson's main aims in "The Real Facts of Life" are to make a contribution towards understanding the history of the struggle for female sexual autonomy; to provide a revolutionary feminist analysis of the social construction of sexuality and its relationship to male power, and to provide a critique of sexology and the male-defined concept of sexual "liberation".

Parents, Children, and the Facts of Life Henry V. Sattler 1952 One of the most important phases in the parental duty of promoting the spiritual welfare of the young is sex education. Unfortunately, to many parents this means nothing more than the imparting of biological facts concerning the process of procreation and the measures to be taken in order to avoid disease. To Catholics, sex education means much more than this. It signifies, primarily, the training of boys and girls to be pure and innocent, and eventually to enter marriage with a noble and holy purpose, if God calls them to that state of life. The present volume is intended to help parents fulfill this particular duty in the training of their boys and girls.

Young People, Sex and the Media D. Buckingham 2003-12-05 Are children today growing up too soon? How do they - and their parents - feel about media portrayals of sex and personal relationships? Are the media a corrupting influence, or a potentially positive and useful resource for young people? Drawing on an extensive research project, which investigated children's interpretations of sexual content in films, TV and print media, this book considers how young people (aged 9-17) use such material to understand their experiences and build their identities, and how they and their parents respond to public concerns about these issues. The book offers a clearly written and entertaining insight into children's and parents' perspectives on these difficult issues - perspectives that are often ignored or trivialised in public debate.

The Pilgrimage of Dorothy Richardson Joanne Winning 2000 Pilgrimage, Dorothy Richardson's thirteen-volume opus of autobiographical fiction, follows the entire arc of an independent woman's life in early twentieth-century Britain. It is one of the major works of the modernist period; indeed, it is considered by many a classic of modernist literature. In this book, Joanne Winning argues in this book, however, that Richardson's novels continue to be misunderstood in several important ways. Winning is the first critic to fully explore the issues of lesbian identity in the novels. Examining primary materials, manuscript drafts, and Richardson's previously unstudied correspondence, Winning demonstrates that Pilgrimage contains a carefully constructed, though concealed, subtext of lesbian desire and sexuality. The Pilgrimage of Dorothy Richardson explores the ways in which Richardson used such cultural forms as sexology, psychoanalysis, and other lesbian and modernist literature of her time to create an intertextual dialogue about lesbian identity. Winning suggests that a sustained reading of lesbian sexuality in Pilgrimage is crucial to a more complete understanding of Richardson's long and sometimes difficult work. Winning also places Pilgrimage in the context of other works by female modernist writers that record lesbian identity. This approach, Winning suggests, is the first step toward recognizing and defining a literary movement that can be termed "lesbian modernism," as well as toward a deeper understanding of how lesbian modernist writers helped shape modernist literature as a whole.
