Morality and Moral Controversies - Steven Scalet 2016-06-23

Morality and Moral Controversies provides students with the tools to understand the philosophical ideas that are shaping our world today. This comprehensive anthology includes classic and contemporary readings in moral theory and the most current applied ethics debates emphasizing international concerns. Through analyzing these readings such as Supreme Court decisions, students will grasp the scope of various philosophical discussions Supreme Court justices must have. Morality and Moral Controversies challenges readers to critically assess leading controversies in moral, social, and political philosophy. Upon completing this book, readers will be able to: Understand philosophical ideas that are shaping our world today. Confront conflicts faced when given the choice of morality. Apply various philosophical ideas to politics, religion, economics, relationships, and medicine. Discuss basic philosophical arguments.

Dogs of War - Jonathan Maberry 2017-04-25

Dogs of War: Robots are no longer science fiction. Autonomous, programmed to react like animals: fast, relentless, deadly. From microscopic nanobots to massive self-guided aircraft. This technology is here, it's assessable, and it's dangerous. What's even scarier is that almost anyone can get their hands on it. A freelance terrorist uses the latest generation of robot dogs to deliver WMDs into cities across America. Sophisticated military weapons systems turn on their human masters. A technological apocalypse is coming and we may be too late to stop it. Joe Ledger and a newly rebuilt Department of Military Sciences square off against this new and terrible threat. Dogs of War pits Joe against a merciless new enemy and an army of techno-terrorists in a race to prevent a global destruction. Let loose the Dogs of War.

Sex Robots - Maurizio Balistreri 2022-09-19

The scientific and technological innovations that will take place over the next decade will transform our society in profound ways. Sex robots, or robots made for sex, are already becoming a reality as a substitute for human beings in bed: although current prototypes are relatively simple and crude, future technological capabilities will render sex robots capable of interacting with humans in more human-like ways. They will be able to recognize their partner, understand their state of mind, and learn their tastes and preferences. Professor Maurizio Balistreri introduces us to the fascinating world of sex of the future by addressing all the ethical issues that the large-scale commercialization of sex robots will raise without taboos and judgements. What will become of love if all our sexual relationships are conducted with machines? What will happen to the world of paid sex and pornography? Will sex robots increase or decrease sexual violence? In addition to confronting the international debate on the moral acceptability of sex robots, this book examines the most recent studies on violent video games and pornography, questioning the widespread belief that playing violent games or witnessing violent representations corrupts people and makes them violent. Not only could sex robots be an essential tool for expressing and exploring our most forbidden sexual fantasies, but they could also be used to treat sex offenders and paedophiles. Sex Robots is a book that questions our prejudices towards sex robots with clarity and simplicity, helping us reason and reflect on a future that is already present, in the awareness that robots will change the world and our lives.

Internet of Crimes - Gerald Reischl 2020-06-14

Das Internet bietet Verbrechern ganz neue Möglichkeiten: Hacker attackieren Bezahlsysteme, beeinflussen Wahlen und ganze Demokratien. Gehackt und erpresst werden nicht nur Konzerne und Internetgrößen wie Facebook oder Microsoft, auch kleine und mittlere Unternehmen sind immer häufiger im Visier der Internetmafia. Jeder, der das Internet nutzt, ob privat oder beruflich, kann Opfer einer Attacke werden. Gerald Reischl zeigt in seinem Buch "Internet of Crimes", mit welchen Szenarien wir alle rechnen müssen, wie man die Gefahr eindämmen kann und was jeder Einzelne tun kann, um nicht selbst Opfer von Internetkriminalität zu werden.

Savage Dragon #234 - Erik Larsen 2018-05-30

ÒGHOSTS FROM THE PASTÓ Malcolm Dragon heads into Dimension-X on a rescue mission to save Angel Murphy, and he comes face to face with an evil alternate-reality version of his own mother: Rapture! Another outstanding achievement from award-winning writer/artist ERIK LARSEN!

Robots Don't Respect Sundays - Mark Antony Rossi 2018-05-22

"Robots Don't Respect Sundays" locates the humor in facts. It's a book of tough, terse and often terrific accounts of science and technology gone awry. Hard-hitting and ethical. Ironic and spiritual. Direct and downright funny.

The 2030 Spike - Colin Mason 2013-06-17

The clock is relentlessly ticking! Our world teeters on a knife-edge between a peaceful and prosperous future for all, and a dark winter of death and destruction that threatens to smother the light of civilization. Within 30 years, in the 2030 decade, six powerful 'drivers' will converge with unprecedented force in a statistical spike that could tear humanity apart and plunge the world into a new Dark Age. Depleted fuel supplies, massive population growth, poverty, global climate change, famine, growing water shortages and international lawlessness are on a crash course with potentially catastrophic consequences. In the face of both doomsaying and denial over the state of our world, Colin Mason cuts through the rhetoric and reams of conflicting data to muster the evidence to illustrate a broad picture of the world as it is, and our possible futures. Ultimately his message is clear; we must act decisively, collectively and immediately to alter the trajectory of humanity away from catastrophe. Offering over 100 priorities for immediate action, The 2030 Spike serves as a guidebook for humanity through the treacherous minefields and wastelands ahead to a bright, peaceful and prosperous future in which all humans have the opportunity to thrive and build a better civilization. This book is powerful and essential reading for all people concerned with the future of humanity and planet earth.

All Systems Red - Martha Wells 2017-05-02

A New York Times and USA Today Bestseller Winner: 2018 Hugo Award for Best Novella Winner: 2018 Nebula Award for Best Novella Winner: 2018 Alex Award Winner: 2018 Locus Award One of the Verge's Best Books of 2017 A murderous android discovers itself in All Systems Red, a tense science fiction adventure by Martha Wells that interrogates the roots of consciousness through Artificial Intelligence. "As a heartless killing machine, I was a complete failure." In a corporate-dominated spacefaring future, planetary missions must be approved and supplied by the Company. Exploratory teams are accompanied by Company-supplied security androids, for their own safety. But in a society where contracts are awarded to the lowest bidder, safety isn't a primary concern. On a distant planet, a team of scientists are conducting surface tests, shadowed by their Company-supplied 'droid — a self-aware SecUnit that has hacked its own governor module, and refers to itself (though never out loud) as "Murderbot." Scornful of humans, all it really wants is to be left alone long enough to figure out who it is. But when a neighboring mission goes dark, it's up to the scientists and their Murderbot to get to the truth. The Digital Dystopias of Black Mirror and Electric Dreams - Steven Keslowitz 2020-01-10

This critical examination of two dystopian television series--Black Mirror and Electric Dreams--focuses on pop culture depictions of technology and its impact on human existence. Representations of a wide range of modern and futuristic technologies are explored, from early portrayals of artificial intelligence (Rossum's Universal Robots, 1921) to digital consciousness transference as envisioned in Black Mirror's "San Junipero." These representations reflect societal anxieties about unfettered technological development and how a world infused with invasive artificial intelligence might redefine life and death, power and control. The impact of social media platforms is considered in the contexts of modern-day communication and

political manipulation.

The Visioneers - W. Patrick McCray 2017-06-06

The story of the visionary scientists who invented the future In 1969, Princeton physicist Gerard O'Neill began looking outward to space colonies as the new frontier for humanity's expansion. A decade later, Eric Drexler, an MIT-trained engineer, turned his attention to the molecular world as the place where society's future needs could be met using self-replicating nanoscale machines. These modern utopians predicted that their technologies could transform society as humans mastered the ability to create new worlds, undertook atomic-scale engineering, and, if truly successful, overcame their own biological limits. The Visioneers tells the story of how these scientists and the communities they fostered imagined, designed, and popularized speculative technologies such as space colonies and nanotechnologies. Patrick McCray traces how these visioneers blended countercultural ideals with hard science, entrepreneurship, libertarianism, and unbridled optimism about the future. He shows how they built networks that communicated their ideas to writers, politicians, and corporate leaders. But the visioneers were not immune to failure—or to the lures of profit, celebrity, and hype. O'Neill and Drexler faced difficulty funding their work and overcoming colleagues' skepticism, and saw their ideas co-opted and transformed by Timothy Leary, the scriptwriters of Star Trek, and many others. Ultimately, both men struggled to overcome stigma and ostracism as they tried to unshackle their visioning from pejorative labels like "fringe" and "pseudoscience." The Visioneers provides a balanced look at the successes and pitfalls they encountered. The book exposes the dangers of promotion—oversimplification, misuse, and misunderstanding—that can plague exploratory science. But above all, it highlights the importance of radical new ideas that inspire us to support cutting-edge research into tomorrow's technologies.

To Be a Machine - Mark O'Connell 2017-03-02

WINNER OF THE WELLCOME BOOK PRIZE 2018 Shortlisted for the Baillie Gifford Prize 2017 A stunning new non-fiction voice tackles an urgent question... what next for mankind? 'Troubling and humorous, this is one of my current give-it-to-everyone books - I buy six copies at a time' Jeanette Winterson

Daemon - Daniel Suarez 2010-01-07

A man is found brutally murdered - and the only possible perpetrator happens to be dead. As more killings follow, it becomes clear that mass carnage is being planned and organised from beyond the grave. The Daemon - a lethal and seemingly unstoppable computer program - is responsible and murder is the least of its capabilities. Masterminded by a twisted genius, the Daemon inhabits the systems on which society depends. In a world where everyone and everything is online, nothing is out of its reach. And as we are all connected, there is no escape... Explosive, action-packed, terrifyingly relevant, Daemon redefines the high-concept thriller for the information age.

Robot Sex - John Danaher 2018-09-11

Perspectives from philosophy, psychology religious studies, economics, and law on the possible future of robot-human sexual relationships. Sexbots are coming. Given the pace of technological advances, it is inevitable that realistic robots specifically designed for people's sexual gratification will be developed in the not-too-distant future. Despite popular culture's fascination with the topic, and the emergence of the much-publicized Campaign Against Sex Robots, there has been little academic research on the social, philosophical, moral, and legal implications of robot sex. This book fills the gap, offering perspectives from philosophy, psychology, religious studies, economics, and law on the possible future of robot-human sexual relationships. Contributors discuss what a sex robot is, if they exist, why we should take the issue seriously, and what it means to "have sex" with a robot. They make the case for developing sex robots, arguing for their beneficial nature, and the case against it, on religious and moral grounds; they consider the subject from the robot's perspective, addressing such issues as consent and agency; and they ask whether it is possible for a human to form a mutually satisfying, loving relationship with a robot. Finally, they speculate about the future of human-robot sexual interaction, considering the social acceptability of sex robots and the possible effect on society. Contributors Marina Adshade, Thomas Arnold, Julie Carpenter, John Danaher, Brian Earp, Lily Eva Frank, Joshua Goldstein, Michael Hauskeller, Noreen Herzfeld, Neil McArthur, Mark Migotti, Sven Nyholm, Ezio di Nucci, Steve Petersen, Anders Sandberg, Matthias Scheutz, Litska Strikwerda, Nicole Wyatt

Political Theory of the Digital Age - Mathias Risse 2023-01-31

With the rise of far-reaching technological innovation, from artificial intelligence to Big Data, human life is increasingly unfolding in digital lifeworlds. While such developments have made unprecedented changes to the ways we live, our political practices have failed to evolve at pace with these profound changes. In this path-breaking work, Mathias Risse establishes a foundation for the philosophy of technology, allowing us to investigate how the digital century might alter our most basic political practices and ideas. Risse engages major concepts in political philosophy and extends them to account for problems that arise in digital lifeworlds including AI and democracy, synthetic media and surveillance capitalism and how AI might alter our thinking about the meaning of life. Proactive and profound, Political Theory of the Digital Age offers a systemic way of evaluating the effect of AI, allowing us to anticipate and understand how technological developments impact our political lives - before it's too late.

Catfishing on CatNet - Naomi Kritzer 2019-11-19

LODESTAR AWARD WINNER FOR BEST YOUNG ADULT BOOK From Hugo and Locus Award-winning author Naomi Kritzer, *Catfishing on CatNet* is a thought-provoking near future YA thriller that could not be more timely as it explores issues of online privacy, artificial intelligence, and the power and perils of social networks. A New York Times Book Review Editors' Choice/Staff Pick A Kirkus Reviews Best Book A Junior Library Guild Selection An Edgar Award Winner for Best Young Adult Novel A Minnesota Book Award Winner for Best Young Adult Novel An Andre Norton Nebula Award Finalist An ITW Thriller Award for Best YA Novel Nominee A Lodestar Award Winner for Best Young Adult Book "A pure delight...that's as tender and funny as it is gripping and fast-paced. This book is perfect. From the believable teenage voices to the shockingly effective thriller plot, it swings effortlessly from charming humor to visceral terror, grounding it all in beautiful friendships, budding romance, and radical acceptance." —The New York Times Because her mom is always on the move, Steph hasn't lived anyplace longer than six months. Her only constant is an online community called CatNet—a social media site where users upload cat pictures—a place she knows she is welcome. What Steph doesn't know is that the admin of the site, CheshireCat, is a sentient A.I. When a threat from Steph's past catches up to her and CheshireCat's existence is discovered by outsiders, it's up to Steph and her friends, both online and IRL, to save her. "Alongside the uplifting message about inclusivity, diversity, and found family—characters of various ethnicities identify as gay, bisexual, nonbinary, asexual, and still exploring—Kritzer's take on a benevolent AI is both whimsical and poignant. An entertaining, heart-filled exploration of today's online existence and privacy concerns." —Publishers Weekly, starred review At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Sex Dolls at Sea - Bo Ruberg 2022-06-14

Investigating and reimagining the origin story of the sex doll through the tale of the sailor's dames de voyage. The sex doll and its high-tech counterpart the sex robot have gone mainstream, as both the object of consumer desire and the subject of academic study. But sex dolls, and sexual technology in general, are nothing new. Sex dolls have been around for centuries. In *Sex Dolls at Sea*, Bo Ruberg explores the origin story of the sex doll, investigating its cultural implications and considering who has been marginalized and who has been privileged in the narrative. Ruberg examines the generally accepted story that the first sex dolls were dames de voyage, rudimentary figures made of cloth and leather scraps by European sailors on long, lonely ocean voyages in centuries past. In search of supporting evidence for the lonesome sailor sex doll theory, Ruberg uncovers the real history of the sex doll. The earliest commercial sex dolls were not the dames de voyage but the femmes en caoutchouc: "women" made of inflatable vulcanized rubber, beginning in the late nineteenth century. Interrogating the sailor sex doll origin story, Ruberg finds beneath the surface a web of issues relating to gender, sexuality, race, and colonialism. What has been lost in the history of the sex doll and other sex tech, Ruberg tells us, are the stories of the sex workers, women, queer people, and people of color whose lives have been bound up with these technologies.

Intersectional Automations - Nathan Rambukkana 2021-06-29

Intersectional Automations explores a range of situations where robotics, biotechnological enhancement,

artificial intelligence (AI), and algorithmic culture collide with intersectional social justice issues such as race, class, gender, sexuality, ability, and citizenship. As robots, machine learning applications, and human augmentics are artifacts of human culture, they sometimes carry stereotypes, biases, exclusions, and other forms of privilege into their computational logics, platforms, and/or embodiments. The essays in this multidisciplinary collection consider how questions of equity and social justice impact our understanding of these developments, analyzing not only the artifacts themselves, but also the discourses and practices surrounding them, including societal understandings, design choices, law and policy approaches, and their uses and abuses.

What Social Robots Can and Should Do - J. Seibt 2016-10-14

Social robotics drives a technological revolution of possibly unprecedented disruptive potential, both at the socio-economic and the socio-cultural level. The rapid development of the robotics market calls for a concerted effort across a wide spectrum of academic disciplines to understand the transformative potential of human-robot interaction. This effort cannot succeed without the special expertise in the study of socio-cultural interactions, norms, and values that humanities research provides. This book contains the proceedings of the conference "What Social Robots Can and Should Do," Robophilosophy 2016 / TRANSOR 2016, held in Aarhus, Denmark, in October 2016. The conference is the second event in the biennial Robophilosophy conference series, this time combined with an event of the Research Network for

Transdisciplinary Studies in Social Robotics (TRANSOR). Featuring 13 plenaries and 74 session and workshop talks, the event turned out to be the world's largest conference in Humanities research in and on social robotics. The book is divided into 3 sections: Part I and Part III contain the abstracts of plenary lectures and contributions to 6 workshops: Artificial Empathy; Co-Designing Children Robot Interaction; Human-Robot Joint Action; Phronesis for Machine Ethics?; Robots in the Wild; and Responsible Robotics. Part II contains short papers for presentations in 7 thematically organized sessions: methodological issues; ethical tasks and implications; emotions in human robot interactions; education, art and innovation; artificial meaning and rationality; social norms and robot sociality; and perceptions of social robots. The book will be of interest to researchers in philosophy, anthropology, sociology, psychology, linguistics, cognitive science, robotics, computer science, and art. Since all contributions are prepared for an interdisciplinary readership, they are highly accessible and will be of interest to policy makers and educators who wish to gauge the challenges and potentials of putting robots in society.

Women vs Feminism - Joanna Williams 2017-10-10

Statistics tell us there has never been a better time to be a woman but feminists are quick to point out that women are still victims of everyday sexism. This title explores what life is like for women today. It's time to ditch a feminism that appears remote from the concerns of most women and, worse, pitches men and women against each other.
