**Sexual Abuse by Health Professionals** P. Susan Penfold 1998-01-01 The author of this book is a psychiatrist, and the survivor of sexual and emotional abuse by the psychiatrist who was her therapist. She employs two voices in the writing of her book: the first part of each chapter is a narration of her own experiences as a victim of abuse; the second part, an account of her journey as a psychiatrist towards understanding the meaning of the abuse and how to heal from it. Her journey includes having a second, very different, experience of therapy; listening to the stories of other survivors of abuse by health professionals; reading published accounts of such abuses; making her story public to professional and general audiences; being a member of a group dedicated to combating sexual abuse by therapists; talking to colleagues who have treated victims of abuse by health professionals; culling ideas from the literature on trauma and abuse; and treating patients who are themselves survivors of abuse by health professionals. Her book is a powerful blend of the personal and the professional that penetrates the 'conspiracy of

silence' that still holds sway and prevents victims from getting the compassion, understanding, support, and financial and legal aid that they deserve.

Child Abuse Stanley M. Sturt 2006 Child abuse and neglect is as, at a minimum any recent act or failure to act on the part of a parent or caretaker which results in death, serious physical or emotional harm, sexual abuse or exploitation; or an act or failure to act which presents an imminent risk of serious harm. Four major types of maltreatment are usually included: neglect, physical abuse, sexual abuse, and emotional abuse. Although any of the forms of child maltreatment may be found separately, they often occur in combination. This book presents issues and research in this field.

**Transcultural Caring Dynamics in Nursing and Health Care**

Marilyn A Ray 2018-05-16 How do you perceive your cultural identity? All of us are shaped by the cultures we interact with and the cultural backgrounds and ethnicities that are part of our heritage. Take a dynamic approach to the study of culture and health care relationships. Dr. Marilyn A. Ray shows us how cultures influence one another through inter-cultural relationships, technology, globalization, and mass communication, and how these influences directly shape our cultural identities in today's world. She integrates theory, practice, and evidence of transcultural caring to show you how to apply transcultural

awareness to your clinical decision making. Go beyond common stereotypes using a framework that can positively impact the nurse-patient relationship and the decision-making process. You'll learn how to deliver culturally competent care through the selection and application of transcultural assessment, planning and negotiation tools for interventions.

Unfitting Stories Valerie Raoul 2007-03-30 Unfitting Stories: Narrative Approaches to Disease, Disability, and Trauma illustrates how stories about ill health and suffering have been produced and received from a variety of perspectives. Bringing together the work of Canadian researchers, health professionals, and people with lived experiences of disease, disability, or trauma, it addresses central issues about authority in medical and personal narratives and the value of cross- or interdisciplinary research in understanding such experiences. The book considers the aesthetic dimensions of health-related stories with literary readings that look at how personal accounts of disease, disability, and trauma are crafted by writers and filmmakers into published works. Topics range from psychiatric hospitalization and aestheticizing cancer, to father-daughter incest in film. The collection also deals with the therapeutic or transformative effect of stories with essays about men, sport, and spinal cord injury; narrative teaching at L'Arche (a faith-based network of communities inclusive of people with developmental disabilities); and the construction of a "schizophrenic" identity. A final section examines the polemical functions of narrative, directing attention to the professional and political contexts within which stories are constructed and exchanged. Topics include ableist limits on self-narration; drug addiction and the disease model; and narratives of trauma and Aboriginal post-secondary students. Unfitting Stories is essential reading for researchers using narrative methods or materials, for teachers, students, and professionals working in the field of health services, and for concerned

consumers of the health care system. It deals with practical problems relevant to policy-makers as well as theoretical issues of interest to specialists in bioethics, gender analysis, and narrative theory. *Women Unsilenced* Jeanne Sarson 2021-08-31 *Women Unsilenced* explores the impact of unthinkable violence committed against women and girls through multiple perspectives—women’s recall of life-threatening ordeals of torture, human trafficking, and organized crime, society’s failure to recognize and address such crimes, and close examinations of how justice, health, political, and social systems perpetuate revictimizing trauma. Written by retired public health nurses who include their own experiences helped give voice and understanding to women who have been silenced. This book discloses their “underground” caring work and offers “kitchen table” research and insights, using women’s storytelling on multiple platforms to educate readers on the unimaginable layers of perpetrators’ modus operandi of violence, manipulation, and deceit. At times raw, painful, and shocking, this book is an important resource for those who have survived such crimes; professionals who support those victimized by torturers and traffickers; police, legal professionals, criminologists, human rights activists, and educators alike. It reveals how healing and claiming one’s relationship with/to/for Self is possible.

[The Body and Consent in Psychology, Psychiatry, and Medicine](#)

Jemma Tosh 2019-11-27 This groundbreaking text interrogates the constructed boundary between therapy and violence, by examining therapeutic practice and discourse through the lens of a psychologist and a survivor of sexual abuse. It asks, what happens when those we approach for help cause further harm? Can we identify coercive practices and stop sexual abuse in psychology, psychiatry, and medicine? Tosh explores these questions and more to illustrate that many of the therapies considered fundamental to clinical practice are deeply problematic when issues of consent and sexual abuse are considered. The book examines a range of situations where medical power and authority produces a context where the refusals and non-consent of oppressed groups are denied, dismissed, or ignored, arguing that key concepts and discourses have resulted in the production and standardisation of a therapeutic rape culture in the helping professions. Tosh uses critical intersectionality theory and discourse analysis to expertly highlight the complex interrelationships between race, class, gender, sexuality, and disability in our understanding of abuse and how we define survivors. Drawing on a wide range of comprehensive examples, including experiences and perspectives from cisgender and transgender men and women, as well as nonbinary and intersex people, this is essential reading for students and researchers of critical and queer psychology, gender studies, as well as mental health practitioners and social workers.

### **Boundary Issues and Dual Relationships in the Human**

**Services** Frederic G. Reamer 2020-11-24 Should a therapist disclose personal information to a client, accept a client's gift, or provide a former client with a job? Is it appropriate to exchange e-mail or text messages with clients or correspond with them on social networking websites? Some acts, such as initiating a sexual relationship with a client, are clearly prohibited, yet what about more subtle interactions, such as hugging or accepting invitations to a social event? Is maintaining a friendship with a former client

or a client's relative a conflict of interest? Frederic G. Reamer offers a frank analysis of a range of boundary issues that human-service practitioners may confront. He confronts the ethics of intimate relationships with clients and former clients, the healthy parameters of practitioners' self-disclosure, the giving and receiving of gifts and favors, and the unavoidable and unanticipated circumstances of social encounters and geographical proximity. With case studies addressing challenges in the mental health field, school contexts, child welfare, addiction programs, home health care, elder services, and prison, rural, and military settings, Reamer offers effective, practical risk-management models that prevent problems and help balance dual relationships. Since the publication of the previous edition of *Boundary Issues and Dual Relationships in the Human Services* in 2012, digital technology has transformed how human-service professionals deliver services to clients. This third edition brings the book up to date, adding discussion of the ways in which practitioners' online communications and technology-based relationships with clients can violate ethical standards and providing practical advice for how to resolve boundary issues.

*Missbrauchtes Vertrauen* Werner Tschan 2005 Dass Helfer selbst zu Tätern werden, scheint unfassbar. Tatsache ist es dennoch. Psychotherapeuten, Psychiater, Psychologen, Seelsorger, Lehrer und Trainer sind nur einige der Berufsgruppen, die eine strukturelle Machtposition gegenüber ihrer Klientel innehaben. Diese Position macht manche Fachleute anfallend für Fehlverhalten und Machtmissbrauch, indem sie das Vertrauensverhältnis zur Befriedigung eigener sexueller Bedürfnisse ausnutzen. In diesem Buch werden Ablauf und Folgen von Grenzverletzungen aus unterschiedlichen Perspektiven aufgezeigt und Grundkenntnisse aus der Forensik, Traumatologie, angewandten Ethik, Sexualmedizin, Präventivmedizin und den Rechtswissenschaften vermittelt. Für die Praxis werden das 5-Schritte-Programm zur Opferhilfe, das

Boundary-Training als Rehabilitations-modell für Tater-Fachleute sowie Lösungsansätze für Institutionen und Behörden vorgestellt. Das Thema Grenzverletzungen richtet sich nicht nur an Psychotherapeuten, Psychiater, Psychologen, Beratungsstellen und Behörden, sondern ist durch die transdisziplinäre Darstellung von grossem Interesse für Juristen, Gerichtsbehörden, Lehrer und in der Erwachsenenbildung Tätige, Seelsorger und Kirchenbehörden, Pflegepersonal und Mitarbeiter im Gesundheitswesen sowie für die interessierte Öffentlichkeit.

Politically Reflective Psychotherapy Manuel Llorens 2020-10-27

This book shows how clinical psychology has been deliberately used to label, control and oppress political dissidence under oppressive regimes and presents an epistemological and theoretical framework to help psychologists deal with the political dilemmas that surround clinical practice. Based on his own experience working as a clinical and community psychologist in Venezuela for almost twenty five years, the author recounts the controversial history of how the Bolivarian Revolution has used psychology to persecute and oppress political dissidents, recovers the experience of doing psychotherapy under oppressive regimes in other countries and stresses the importance of developing an ethically and politically aware clinical practice. The first part of the book presents the dilemmas psychotherapists have faced in different parts of the world, such as the former Soviet Union, USA, China, Spain, Hungary, Argentina, Brazil, Uruguay, and Venezuela when dealing with the intrusion of the political domain in clinical research and practice and the difficulties clinicians have had in dealing with these issues. The second part of the book presents an epistemological and theoretical framework from which these issues may be tackled effectively. The book helps raise awareness of the risks of framing psychotherapy as apolitical as well as the benefits of thinking of our lives as contextualized in our political settings. It draws from several

theoretical options that have been useful to challenge traditional clinical theory and include the political in our clinical comprehensions. In particular Latin American Community Psychology, that has developed tools to favor awareness of political issues, has been used to expand the psychotherapeutic conversation. Politically Reflective Psychotherapy: Towards a Contextualized Approach will help clinical psychologists, psychiatrists and other social and mental health workers reflect on the challenges psychotherapy faces in a politically polarized society, showing how the political dimension can be incorporated into clinical practice.

Professional Sexual Misconduct in Institutions Werner Tschan

2013-10-01 Essential reading about a notoriously difficult problem: how abusive professionals manipulate their clients and what we as organizations and individuals can do about it Professional sexual misconduct (PSM) is a problem that is notoriously difficult to address and that can be a minefield for all concerned - for victims, for the institutions where it takes place, and also because outstanding and supposedly responsible members of society may be accused of abuse. Here, Werner Tschan, one of the world's leading experts on the prevention of PSM, outlines an up-to-date approach to PSM and other professional disruptive behaviors. He describes practical ways to prevent PSM, as well as effective treatments for victims and those accused. Using examples from real-life cases from around the world, he also discusses how PSM is a societal problem and what we can do to stop it. Recent headline cases involving a variety of organizations - medical, media, church, schools, sport, industry - show that institutions can be ideal environments for PSM and so great emphasis is placed in this volume on preventive measures

that we can and must take at an institutional level. With clear, jargon-free writing, this book is essential reading for all professionals interested in preventing and dealing with PSM, as well as of interest to victims and their families as well.

**Counseling Addicted Families** Gerald A. Juhnke 2013-08-16  
Although one person's addiction almost inevitably affects his or her family members, a surprising number of treatment models appear to operate under the assumption that an individual's addiction occurs in a vacuum. By not paying sufficient attention to preexisting family dynamics-whether dysfunctional, supportive, or somewhere in between-counselors run the risk of not fully understanding the roots of an individual's addictions or the

obstacles to his recovery; as a result, counselors may undermine their own treatment efforts both by neglecting any underlying family problems and by failing to capitalize upon a family's potential assistance in an intervention with the addicted individual. In *Counseling Addicted Families*, Gerald A. Juhnke and William Bryce Hagedorn address this problem head-on.

Recognizing that even those treatment providers who understand the importance of the familial context of addiction are often stymied by the variety of family treatment theories and their often imperfect fit for cases of addiction, Juhnke and Hagedorn provide a truly integrated model for assessment and treatment. Based upon the authors' combined 23 years of experience in clinical and treatment supervision, the Integrated Family Addictions Model consists of six progressive treatment tiers which organize the relevant family treatment theories into a graduated and coherent sequence, beginning with the briefest and least costly forms of therapy. If one of the lower tiers allows clients to reach their treatment goals, the patient and therapist need not waste time and resources following the full continuum. If, however, their needs are still unmet, they can progress in a logical fashion to more advanced and intensive forms of therapy. The book is divided into three broad topic areas designed to provide counselors and graduate students with essential information both about addictions and about the practical applications of various treatment theories. Part One discusses the prevalence of addictions, their negative impact upon families, and the primary existing addiction treatment models, including their limitations and benefits. Part Two outlines methods of assessment for individual cases, and Part Three presents the Integrated Family Addictions Model in detail. Along the way, the authors deal with specific interventions for families dealing with violence and dual diagnosis. The book concludes with an epilogue on professional training, which includes an overview of the major professional addiction and marriage and family counseling organizations, and

the ways in which they might benefit individual practices and practitioners.
