A Typology of Domestic Violence Michael P. Johnson 2010-09-01 Reassesses thirty years of domestic violence research and demonstrates three forms of partner violence, distinctive in their origins, effects, and treatments

Queering Narratives of Domestic Violence and Abuse Catherine Donovan 2020-02-14 This book is the first to focus on violent and/or 'abusive' behaviours in lesbian, gay, bisexual and/or transgender, non-binary gender or genderqueer people's intimate relationships. It provides fresh empirical data from a comprehensive mixed-methods study and novel theoretical insights to destabilise and queer existing narratives about intimate partner violence and abuse (IPVA). Key to the analysis, the book argues, is the extent to which Michael Johnson's landmark typology of IPVA can be used to make sense of the survey data and accounts of 'abusive' behaviours given by LGB and/or T+ participants. As well as calling for IPVA scholars to challenge heteronormativity and cisnormativity and improve IPVA measurement, this book offers guidance and a new tool to assist practitioners from a variety of relationships services with identifying victims/survivors and perpetrators in LGB and/or T+ people's relationships. It will appeal to academics and practitioners in the field of domestic violence and abuse.

Men, Masculinities and Intimate Partner Violence Lucas Gottzén 2020-11-05 Men, Masculinities and Intimate Partner Violence examines how gender and other social identities and inequalities shape experiences of, and responses to, violence in intimate relationships. It provides new insights into men as both perpetrators and victims of violence, as well as on how to involve men and boys in anti-violence work. The chapters explore partner violence from the perspectives of researchers, therapists, activists, organisations, media as well as men of different background and sexual orientation. Highlighting the distinct and ambivalent ways we relate to violence and masculinity, this timely volume provides nuanced approaches to men, masculinity and intimate partner violence in various societies in the global North and South. This book foregrounds scholarship on men and masculinities in the context of intimate partner violence. By doing so, it revitalises feminist theorising and research on partner abuse, and brings together the fields of masculinity studies and studies of intimate partner violence. The book will be a vital resource for students and scholars in criminology, gender studies, psychology, social work and sociology, as well as those working with men and boys.

Women Who Perpetrate Relationship Violence Frederick Buttell 2014-06-03 Find out what drives women to violence in their intimate relationships—and how to prevent it Women Who Perpetrate Relationship Violence examines the causes and consequences of violence initiated by women against their partners. This unique book fills the void of available literature on domestically violent women, taking a frank look at the issues surrounding female batterers who are the primary aggressors in their intimate relationships. Contributors write candidly about the similarities and differences between violent women and violent men, how to develop effective interventions, existing theories on the development of abusive behavior in women, and society's response to violent women. The counseling and psychological community has responded to the problem of domestic abuse and violence against women. But very little has been done to address the issues of domestic abuse and violence committed by women. Women Who Perpetrate Relationship Violence presents innovative original research that focuses specifically on women as offenders, rather than simply adapting programs created for male batterers to women. The book includes epidemiological studies, secondary analyses, personality profiles, and a study of women entering a 16-week, court-mandated, batterer intervention program (BIP). Women Who Perpetrate Relationship Violence examines:

predictors of intimate violence, including antisocial criminal records, alcohol abuse, and personality disorders associations between interpersonal dependency and violence elevated histrionic, narcissistic, and compulsive personality traits personality disorders lethal domestic assaults recidivism differences in demographic and psychological variables between women who complete treatment programs and those who drop out and much more Women Who Perpetrate Relationship Violence is an invaluable professional resource for psychologists, social workers, and counselors.

Domestic Violence and Family Safety Janette Cooper 2008-09-15 The book aims to explore the exciting opportunities offered by a systemic approach for mental health professionals and psychotherapists when working with families and other systems where domestic violence in intimate relationships is of concern. The main purpose of the book lies in the application of systemic thinking to safety and to understanding the complexity of domestic violence on family relationships over time. The authors outline their approach to these complex issues based on their eight years of joint experience in the Reading Safer Families project. They draw from a broad field of family psychology and systemic psychotherapy to distil the theories, methods and techniques most helpful to practitioners working in modern public and voluntary agencies. Their systemic approach to issues of risk, responsibility and collaboration provides a coherent framework within which to integrate practice. The book also provides a practice orientated and detailed approach to risk assessment, risk management and family reunification. This book will be of interest to practitioners in clinical and educational psychology, social work, nursing, psychiatry, probation, health visiting, counselling and psychotherapy, who work with individuals living in intimate relationships where violence may be of concern, and also to practice supervisors, trainers, trainees and students in these disciplines.

Coercive Control Evan Stark 2009 Drawing on cases, Stark identifies the problems with our current approach to domestic violence, outlines the components of coercive control, and then uses this alternate framework to analyse the cases of battered women charged with criminal offenses directed at their abusers.

If I Had Known... Scott Vinci 2020-11-14 If you are dating, in a relationship, or someone who is beginning to have intimate relationships you need to read this. Over the course of 10 years the author collected his observations from more than 1200 domestic violence offenders and their intimate partners. In "IF I HAD KNOWN" he reveals the word patterns and behaviors of abusive men which indicate a propensity and disposition that leads to escalating abuse and potential violence in their intimate relationships. This unique book reveals the signs and signals you want to be aware of so you can recognize the early warning signs to detect potential patterns of abuse to avoid getting involved with an abusive partner before you invest your time, your energy, your resources, and your heart in a relationship with the potential for abuse, or to get out of an abusive relationship before it is too late. The Perpetrator-Victim Relationship: An Important Clue to Understanding Intimate Partner Homicide in China Shuhong Zhao 2022-01-15

This book is devoted to illustrating the significance of perpetrator-victim relationship, including its status and state, in understanding intimate partner homicide (IPH) in the context of China today after comparing with the findings in the previous studies. By analyzing the correlation between intimate relationships as a focal variable and other variables such as IPH characteristics and risk factors, a deeper understanding of IPH in China today has emerged. Finally, this book shows that many perpetrators and victims had intimate relationships with people outside their marriages as the main reason for the rapid increase in the number of instances of IPH, which seems to be in tandem with China's rapid modernization and urbanization. Presenting the sole academic research that closely investigates the characteristics of intimate partner homicide in modern China, the book is a valuable resource for not only for the Chinese government but also for Chinese and international researchers.

Leaving a Violent Relationship Adele Jones 2021-05-06 Intimate partner violence (IPV), defined as physical, sexual, emotional, and economic abuse and controlling behaviors inflicted within intimate partner relationships, is a global crisis that extends beyond national and sociocultural boundaries, affecting people of all ages, religions, ethnicities, and economic backgrounds. Though studies exist that seek to explain how people become trapped within violent relationships and what factors facilitate survival, escape and safety, this book provides fresh insights into this complex and multifaceted issue. People often ask of women in abusive relationships "why does she stay?" Critics suggest that this question carries implicit notions of victim blame and fails to hold to account the perpetrators of abuse. The studies described in this book, however, explore the question from the perspectives of survivors and represent a shift away from individual pathology to an approach based on the recognition of structural oppression, agency and resilience. Comprising eight chapters, new theoretical frameworks for the analysis of IPV are provided to guide practitioners and policy makers in improving services for vulnerable people in abusive relationships, and a range of studies into the experiences of a diverse range of survivors, including mothers in Portugal, women who experienced child marriage in Uganda, and refugees in the United States of America, generate findings which elucidate perspectives from marginalised and under-researched groups.

Men's Experiences of Violence in Intimate Relationships Marianne Inéz Lien 2019-01-04 This open access book draws on a broad study on violence against men, from both male and female partners in Norway, to contribute to the research on intimate partner violence. It identifies similarities in men's experiences and backgrounds, including in their perceptions of their own victimisation. Marianne Inez Lien and Jørgen Lorentzen argue that the traditional gender power model should be modified and supplemented, and propose that we consider violence in terms of psychological supremacy, rather than in terms of femininity and masculinity. Men's Experiences of Violence in Intimate Relationships will appeal to students and scholars across a range of areas including criminology, sociology and family violence, and gender studies.

Intimate Partner Sexual Violence Louise McOrmond Plummer 2013-10-21 Intimate Partner Sexual Violence (IPSV) is the most common type of sexual violence and a common component of domestic violence, yet most cases go unreported and service responses are often inadequate. This book brings together advice for all those professionals working with individuals who have experienced IPSV and puts forward recommendations to tackle this prevalent form of sexual violence. With contributions from leading experts on IPSV, *Intimate Partner Sexual Violence* is a comprehensive guide to the subject which bridges the gap between research and practice. Multidisciplinary and international in approach, the book covers key issues salient to all professionals - the impact of IPSV, reproductive coercion, the physical and psychological indicators, possible consequences of taking a case to court, and best practice service responses. One section also addresses the risks and needs of IPSV victims in different contexts, such as those in same-sex or teenage relationships, immigrant victims, and those living in rural areas or in prison. This is an authoritative resource for all professionals who work with IPSV victims including counselors, social workers, refuge workers, victim advocates, mental health professionals, pastoral workers, lawyers, police, and health practitioners.

Perpetrators of Intimate Partner Sexual Violence Louise McOrmond-Plummer 2016-12-08 Research shows that intimate partner sexual violence (IPSV) is the most common form of sexual assault. Professional focus is often on the victim, but more information is needed about the perpetrators in order to have a fuller understanding of this crime. The very nature of IPSV - sexual assault within a relationship - means that professionals who work with victims must understand the dynamics of perpetrators as well. This new book will distill the knowledge that exists about perpetrators of IPSV. It includes chapters by authors who have worked directly with IPSV perpetrators and covers important subjects such as addressing IPSV in batterer groups, police management strategies, the danger of IPSV to children, the different types of violence perpetrators use, and prevention approaches for young people. There is also still a widely held view that rapists are strangers in alleyways. This book is intended to educate professionals about who is a perpetrator, as well as to highlight the very real danger these perpetrators represent, including a heightened risk of lethality. The contributors look at the social context of IPSV and the implications for prevention and provide hands-on knowledge to practitioners in a number of fields. The book may also be used within the academic context in fields such as social work, sociology, counseling, psychology, medicine, nursing, criminal justice, and law.

Nature and Culture in Intimate Partner Violence Silvia Bonino 2018-11-16 This innovative book aims to further our understanding of violence in intimate relationships between men and women by combining research from psychology, cultural studies, and biology. The author examines why western culture often justifies and encourages primitive forms of relationships based on domination and submission and considers not only the cultural influences, but also the biological aspects, in their interaction. The book clarifies the biological roots of aggression and affection in intimate relationships in humans, showing that considering the biological roots of male dominance on women does not imply any justification. Bonino makes the case that awareness about the biological roots of violence, and about the cultural messages supporting them, is necessary for developing different messages and educational practices promoting human capacity of personal affective relationship, where partners empathically recognize themselves as equal human beings. Relationships are examined in relation to a domination/submission framework, with the author emphasizing the role individuals can play in promoting non-aggressive relationships. By examining aggressive behaviour in relation to cultural, social psychological, and biological ideas, the author seeks to clarify the cause of violence in relation to gendered roles. This is fascinating reading for anyone interested in violence in relationships and suitable for students and academics in psychology and the social sciences.

The Abusive Personality, Second Edition Donald G. Dutton 2006-12-19 This influential book provides an innovative framework for understanding and treating intimate partner violence. Integrating a variety of theoretical and empirical perspectives, Donald G. Dutton demonstrates that male

abusiveness is more than just a learned pattern of behavior--it is the outgrowth of a particular personality configuration. He illuminates the development of the abusive personality from early childhood to adulthood and presents an evidence-based treatment approach designed to meet this population's unique needs. The second edition features two new chapters on the neurobiological roots of abusive behavior and the development of abusiveness in females.

Intimate Partner Violence Elizabeth A. Bates 2019-03-28 Since the 1970s the issue of intimate partner violence (IPV) has been explained through the patriarchal desire of men to control and dominate women, but this gendered perspective limits both our understanding of IPV and its treatment. *Intimate Partner Violence: New Perspectives in Research and Practice* is the first book of its kind to present a detailed and rigorous critique of current domestic violence research and practice within the same volume. In this challenging new text, with contributions from the UK, the US, and Canada, the subject is assessed from a more holistic position. It provides a critical analysis of the issue of domestic violence including issues that are often not part of the mainstream discussion. Each of the chapters tackles a different area of research or practice, from a critical review of contemporary topics in domestic violence research, including a critical review of men's use of violence in relationships, a consideration of male victims, IPV within the LGBTQ+ community, perceptions of perpetrators and victims, and IPV within adolescent populations. The second half of the book examines challenges and opportunities for professionals working in the field and includes an analysis of an evidence informed perpetrator programme, the challenges faced working with male victims, and a discussion of the impact of domestic violence on children. Culminating with a series of evidence-based recommendations to bridge the divide between academic and practitioner stakeholders and to inform future working practices, this is an essential resource for students and practitioners alike.

Intimate Partner Violence Sana Loue 2006-04-11 It is clear that physical abuse is an integral component of some intimate relationships. This book addresses not the violence but our responses or lack of responses to that violation of personal integrity and the accompanying trauma. How partner violence is responded to, individually and collectively, may well determine whether the violence can be prevented or will cease once begun. This text is intended to serve as a basic resource for the student, clinician and researcher. It provides a summary of how we have responded to such violence in the past and presents potential future directions for research and prevention efforts.

The Abusive Personality Donald G. Dutton 1998-08-06 Physical violence may be the most overt manifestation of relationship abuse, but maltreatment of intimate partners takes many other forms as well. This integrative work explores the nature of male abusiveness by focusing on the development of a particular personality constellation--one that is easily threatened, jealous, and fearful, and that masks these emotions with anger and demands for control. Presenting results of controlled research with over 400 batterers, Dutton shows that many abusers exhibit high levels of trauma symptoms. This symptomatology is cogently linked to elements of childhood experience including witnessing of violence, the use of shaming techniques by parents, and insecure attachment; and, in turn, to such characteristics as terror of abandonment and the inability to regulate one's emotions or deal with conflict effectively. A concluding chapter focuses on treatment.

Rethinking Domestic Violence Donald G. Dutton 2011-01-01 *Rethinking Domestic Violence* is the third in a series of books by Donald Dutton critically reviewing research in the area of intimate partner violence (IPV). The research crosses disciplinary lines, including social and clinical psychology, sociology, psychiatry, affective neuropsychology, criminology, and criminal justice research. Since the area of IPV is so heavily politicized, Dutton tries to steer through conflicting claims by assessing the best research methodology. As a result, he comes to some very new conclusions. These conclusions include the finding that IPV is better predicted by psychological rather than social-structural factors, particularly in cultures where there is relative gender equality. Dutton argues that personality disorders in either gender account for better data on IPV. His

findings also contradict earlier views among researchers and policy makers that IPV is essentially perpetrated by males in all societies. Numerous studies are reviewed in arriving at these conclusions, many of which employ new and superior methodologies than were available previously. After twenty years of viewing IPV as generated by gender and focusing on a punitive "law and order" approach, Dutton argues that this approach must be more varied and flexible. Treatment providers, criminal justice system personnel, lawyers, and researchers have indicated the need for a new view of the problem -- one less invested in gender politics and more open to collaborative views and interdisciplinary insights. Dutton's rethinking of the fundamentals of IPV is essential reading for psychologists, policy makers, and those dealing with the sociology of social science, the relationship of psychology to law, and explanations of adverse behaviour.

[The Psychology of Violence in Adolescent Romantic Relationships](#) Erica Bowen 2015-02-25 Domestic violence in adolescent romantic relationships is an increasingly important and only recently acknowledged social issue. This book provides conceptual frameworks for the design and evaluation of interventions with a focus on developing evidence based practice, as well as a research, practice and policy agenda for consideration.

Examining Gender-Related Differences in the Implicit Attitude Towards Partner Violence Mario Schlemmer 2020-01-20 Bachelor Thesis from the year 2017 in the subject Psychology - Social Psychology, grade: 1, Klagenfurt University (Institut für Psychologie), language: English, abstract: This thesis explores if the implicit attitude towards intimate partner violence (IPV) varies systematically as a function of observers and perpetrators gender, if women and men as observers have different implicit attitude towards IPV depending on which gender is the perpetrator and which gender is the victim of IPV. Until recently research on attitudes towards IPV has focused on explicit attitudes, while partner violence may have automatic behavioral components guided by implicit beliefs and attitudes. In the present thesis, the IAT - a measure of implicit attitudes that is easily adaptable to different contexts - measured participants implicit attitude towards gender-specific physical IPV. Participants (74 women and 20 men) also completed explicit measures which assessed partner violence victimization and perpetration, emotional flooding, feminist attitudes, rape myth acceptance, explicit attitudes towards IPV and depressive symptoms. The analysis revealed that in the IAT women strongly preferred violence of women against men over violence of men against women, while male participants showed no gendered bias. This finding demonstrates the importance of women's own gender bias for their implicit attitude towards incidents of intimate partner violence.

Intimate Partner Violence and the LGBT+ Community Brenda Russell 2020-05-28 Intimate Partner Violence is a serious social problem affecting millions in the United States and worldwide. The image of violence enacted by a male aggressor to a female victim dominates public perceptions of intimate partner violence (IPV). This volume examines how this heteronormativity influences reporting and responding to partner violence when those involved do not fit the stereotype of a typical victim of IPV. Research and theory have helped us to understand power dynamics about heterosexual IPV; this book encourages greater attention to the unique issues and power dynamics of IPV in sexual minority populations. Divided into five distinct sections, chapters address research and theories associated with IPV, examining the similarities and differences of IPV within heterosexual and gender minority relationships. Among the topics discussed: Research methodology and scope of the problem Primary prevention and intervention of IPV among sexual and gender minorities Barriers to help-seeking among various populations Promoting outreach and advocacy Criminal justice response to IPV With recommendations for intervention and prevention, criminal justice response and policy, Intimate Partner Violence and the LGBT+ Community: Understanding Power Dynamics will be of use to students, researchers, and practitioners of psychology, criminal justice, and public policy.

Domestic Violence and Psychology Paula Nicolson 2019-01-11 Despite changes to laws and policies across most western democracies intended to combat violence to women, intimate partner violence and abuse (IPVA) remains discouragingly commonplace. Domestic Violence and Psychology:

Critical Perspectives on Intimate Partner Violence and Abuse showcases women's harrowing stories of living with and leaving violent partners, offering a psychological perspective on domestic violence and developing a theoretical framework for examining the context, intentions and experiences in the lives of people who experience abuse and abuse themselves. Nicolson provides an analysis of survivors' real-life stories, and thoughts about IPVA. The attitudes of the general public and health and social care professionals are also presented and discussed. The theoretical perspective employs three levels of evidence - the material (context), discursive (explanations) and intrapsychic (emotional). Domestic Violence and Psychology is divided into three parts accordingly, engaging qualitative data from interviews and quantitative data from surveys to illustrate these theoretical perspectives. Although many pro-feminist sociologists and activists firmly believe that any attempt to explain domestic violence potentially condones it, this book takes up the challenge to make a compelling case demonstrating how we need to widen understanding of the psychology of survivors and their intimate relationships if we are to defeat IPVA. The new edition has been updated to include the latest developments in IPVA research and practice, and in particular examines the impact of a violent and abusive family life on all members, including children. This is essential reading for students, academics and professionals interested in domestic abuse, as well as professionals and practitioners, including psychologists, social workers, the police, prison officers, probation staff, policy makers, and charity workers.

Sexual Violence in Intimacy M. Gabriela Torres 2020-11-26 Integrating interdisciplinary and cross-cultural analysis, this volume advances our understanding of sexual violence in intimacy through the development of more nuanced and evidence-based conceptual frameworks. Sexual violence in intimacy is a global pandemic that causes individual physical and emotional harm as well as wider social suffering. It is also legal and culturally condoned in much of the world. Bringing together international and interdisciplinary research, the book explores marital rape as individual suffering that is best understood in cultural and institutional context. Gendered narratives and large-scale surveys from India, Ghana and Africa Diasporas, Pacific Islands, Denmark, New Zealand, the United States, and beyond illuminate cross-cultural differences and commonalities. Methodological debates concerning etic and emic approaches and de-colonial challenges are addressed. Finally, a range of policy and intervention approaches—including art, state rhetoric, health care, and criminal justice—are explored. This book provides much needed scholarship to guide policymakers, practitioners, and activists as well as for researchers studying gender-based violence, marriage, and kinship, and the legal and public health concerns of women globally. It will be relevant for upper-level students and scholars in anthropology, sociology, psychology, women's studies, social work and public and global health.

To Have and To Hurt Angela Brownemiller Ph.D. 2007-08-30 Every year, nearly 2 million injuries and some 1,300 deaths result from so-called intimate partner violence. In this work, psychotherapist Browne-Miller uses vignettes, as well as standing and emerging research, to detail both healthy and hurtful relationships and to show partners how to recognize and change relationships on, or headed toward, the path to abuse. She also explains when to leave a relationship, as well as how to do that so as to disentangle without further harm. This is a book that will interest not only those involved in, or who know of someone who is or might be involved in, an abusive relationship, but also students and scholars of psychology,

counseling, social work, women's studies, and men's studies. When Cathy and John married 20 years ago, the relationship seemed almost charmed. But over the years as John's career became more established and Cathy raised the family of three children, things changed. First angry fights developed, followed by verbal and gestured threats of violence, and later, actual physical attacks and injuries. Several times Cathy called police, but when they arrived, fearing the social stigma as well as John's retribution, she would explain her injuries as dealt out by a prowler. When friends or family asked, she would claim the cuts or bruises were due to a fall or some other accident. But eventually, when her arm had been broken, a tooth knocked out, and her face bruised so badly she could not cover it up with makeup, she finally left the house and her husband—only to be stalked. Cathy and John are one couple that Angela Browne-Miller introduces us to in this book that looks at the increasingly publicized incidence of intimate partner violence, abuse that takes place behind closed doors, inside marriages and other loving relationships. Only a fraction of this abuse is ever reported, so just a fragment of the problem is reflected in national statistics that show nearly 2 million injuries and some 1,300 deaths annually caused by this so-called intimate partner violence. In this work, Browne-Miller uses vignettes, as well as standing and emerging research, to help us recognize the difference between a relationship being effected by normal stressors, and one that is abusive, or perhaps even deadly. Psychotherapist Browne-Miller details both healthy and hurtful relationships and shows partners how to recognize and change relationships on, or headed down, the path to abuse. And she also explains when we should leave a relationship, as well as how to do that to disentangle without further harm. This is a book that will interest not only lay readers who are involved in, or know of someone who is or might be involved in, an abusive relationship, but also students and scholars of psychology, counseling, social work, women's studies, and men's studies.

Men's Experiences of Violence in Intimate Relationships Jørgen Lorentzen 2020-10-08 This open access book draws on a broad study on violence against men, from both male and female partners in Norway, to contribute to the research on intimate partner violence. It identifies similarities in men's experiences and backgrounds, including in their perceptions of their own victimisation. Marianne Inez Lien and Jørgen Lorentzen argue that the traditional gender power model should be modified and supplemented, and propose that we consider violence in terms of psychological supremacy, rather than in terms of femininity and masculinity. *Men's Experiences of Violence in Intimate Relationships* will appeal to students and scholars across a range of areas including criminology, sociology and family violence, and gender studies. Preventing Violence in Relationships Paul A. Schewe 2009 In this book, contributing authors take a developmental approach to examining violence prevention in intimate relationships and families. Until recently, the study of violence prevention has focused on reducing the incidence of assaults by strangers, despite statistics that indicate people are twice as likely to be victimized by a friend, relative, or intimate partner. Authors view

relationship violence not only as something that may be prevented at many points during the life span of a person, but also as something that must be prevented at key points, especially during childhood, if violence is to be reduced in the future. All violence is essentially interpersonal, so the contributors to this book focus on healthy interpersonal relationship skills as the basis for preventing violence. Each chapter covers relationship violence at a different stage of life and in different relationships, from child and partner abuse to rape and elder abuse. Authors provide empirical research results as well as practical guidance for day-to-day interventions in the lives of children and adults.
