Judgment Ridge Dick Lehr 2009-01-23 This "irresistibly absorbing" true crime investigation uncovers the brutal murder of two Dartmouth professors by a pair of students in 2001 (Publishers Weekly). On a cold night in January 2001, the idyllic community of Dartmouth College was shattered by the discovery that Half and Susanne Zantop, two of its most beloved professors, had been hacked

to death in their own home. Investigators searched helplessly for clues linking the victims to their murderers. Weeks later, in the nearby town of Chelsea, Vermont, they sought out a pair of high school seniors for questioning. Then Robert Tulloch and his best friend, Jim Parker, fled. Suddenly, two of Chelsea's brightest and most popular sons had become fugitives, wanted for the murders of Half and Susanne Zantop. Authors Mitchell Zuckoff and Dick Lehr provide a vivid explication of a murder that captivated the nation, as well as dramatic revelations about the forces that turned two popular teenagers into killers. Judgement Ridge conveys the devastating loss of Half and Susanne Zantop, while also providing a clear portrait of the killers, their families, and their community—and, perhaps, a warning to any parent about what evil may lurk in the hearts of boys.

“Aid and Comfort” Henry Mark Holzer 2015-08-13 Jane Fonda’s visit to Hanoi in July 1972 and her pro-North Vietnamese, anti-American conduct, especially her pose with an anti-aircraft gun used to shoot down American planes and her propaganda broadcasts directed toward American troops, angered many Americans. In their eyes, she was guilty of treason, but she was never charged by the American legal system. Instead, she has made millions, been the recipient of countless awards, and

remained an honored American icon. This work investigates Fonda's activities in North Vietnam and argues that she could have been indicted for treason, that there would have been enough evidence to take the case to a jury, that she could have been convicted, and that a conviction probably would have been upheld on appeal. It also considers Fonda's early life and the effect it had on her behavior and beliefs in her later years, her audience of American POWs who were forced by the Vietnamese to listen to her broadcasts condemning them as war criminals, her arrival in Vietnam and how it was viewed by American servicemen and civilians, the crime of treason throughout history, and the only Congressional inquiry into her actions, which resulted in the government's decision to take no legal action against her. Texts of Fonda's radio broadcasts to American servicemen comprise the appendix.

Architectural Intelligence Molly Wright Steenson 2022-11-01 Architects who engaged with cybernetics, artificial intelligence, and other technologies poured the foundation for digital interactivity. In *Architectural Intelligence*, Molly Wright Steenson explores the work of four architects in the 1960s and 1970s who incorporated elements of interactivity into their work. Christopher Alexander, Richard Saul Wurman, Cedric Price, and Nicholas Negroponte and the MIT Architecture Machine Group all incorporated technologies—including cybernetics and artificial intelligence—into their work and influenced digital design practices from the late 1980s to the present day. Alexander, long before his famous 1977 book *A Pattern Language*, used computation and structure to visualize design problems; Wurman popularized the notion of “information architecture”; Price designed some of the first intelligent buildings; and Negroponte experimented with the ways people experience artificial intelligence, even at architectural scale. Steenson investigates how these architects pushed the boundaries of architecture—and how their

technological experiments pushed the boundaries of technology. What did computational, cybernetic, and artificial intelligence researchers have to gain by engaging with architects and architectural problems? And what was this new space that emerged within these collaborations? At times, Steenson writes, the architects in this book characterized themselves as anti-architects and their work as anti-architecture. The projects Steenson examines mostly did not result in constructed buildings, but rather in design processes and tools, computer programs, interfaces, digital environments. Alexander, Wurman, Price, and Negroponte laid the foundation for many of our contemporary interactive practices, from information architecture to interaction design, from machine learning to smart cities.

Buyology Martin Lindstrom 2010-02-02 NEW YORK TIMES BESTSELLER • “A fascinating look at how consumers perceive logos, ads, commercials, brands, and products.”—Time How much do we know about why we buy? What truly influences our decisions in today’s message-cluttered world? In *Buyology*, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can “cool” brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? *Buyology* is a fascinating and shocking journey into the mind of today's consumer that will captivate anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.

Altogether, more than 12 million copies of the two novels have been sold in the United States. Based on original research in Russia, dozens of interviews with Rand's acquaintances and former acolytes, and previously unexamined archives of tapes and letters, *AYN RAND AND THE WORLD SHE MADE* is a comprehensive and eye-opening portrait of one of the most significant and improbable figures of the twentieth century.

Beautiful Losers Samuel Francis 1994-08 In this collection of essays, Washington Times columnist Francis argues that the 1992 victory of the Democratic Party in the presidential campaign marks not only the end of the Reagan-Bush era but the failure of American conservatism. He asserts that the changes of the last decade have led to a virtual disappearance of the political Right, and that for the first time since the New Deal, the nation faces the prospect of political democracy without an oppositional force to liberalism. Waging the War of Ideas John Blundell 2023 This paper discusses how wars of ideas can be waged, using the authors extensive experience, both as director general of the Institute of Economic Affairs (IEA) and at other classical liberal think tanks. John Blundell begins his stimulating collection of published essays, reviews and introductions by showing how the founders of the IEA successfully fought the conventional planning wisdom of the 1960s and 1970s, providing the ideas which, by the 1980s and 1990s, had brought about increased freedom and a revival in the use of markets. He draws lessons from those days and then surveys the contemporary scene, showing how the anti-liberal ideas emerging now are different from those which prevailed in the early years of the IEA. As well as giving a valuable view of the IEAs development in the past, these essays also offer advice on how to continue winning in the new circumstances of the present. *Waging the War of Ideas* has been constantly in demand since it was first published in 2001. This new and expanded edition contains seven new chapters and is introduced by Professor Walter Williams.

Private Empire Steve Coll 2012-07-05 Steve Coll's *Private Empire* is winner of the FT/GOLDMAN SACHS BUSINESS BOOK OF THE YEAR AWARD 2012. In this prize-winning book, the author of *Ghost Wars* and *The Bin Ladens* investigates the notoriously mysterious ExxonMobil Corporation and the secrets of the oil industry In many of the nations where it operates, ExxonMobil has a greater sway than that of the US embassy, its annual revenues are larger than the total economic activity in most countries and in Washington it spends more on lobbying than any other corporation. Yet despite its outsized influence, it is to outsiders a black box. *Private Empire* begins with the Exxon Valdez accident in 1989 and closes with the Deepwater Horizon oil spill. Steve Coll's narrative spans

the globe, taking readers to Moscow, impoverished African capitals, Indonesia and elsewhere as ExxonMobil carries out its activities against a backdrop of blackmail threats, kidnapping, civil wars, and high-stakes struggles at the Kremlin. In the US, Coll goes inside ExxonMobil's ruthless Washington lobbying offices and its corporate headquarters in Irving, Texas, where top executives oversee a bizarre corporate culture of discipline and secrecy. *Private Empire* is the masterful result of Steve Coll's indefatigable reporting, from the halls of Congress to the oil-laden swamps of the Niger Delta; previously classified U.S. documents; heretofore unexamined court records; and many other sources.

“Truth Behind Bars” Paul Kellogg 2021-11-05 Just north of the Arctic Circle is the settlement of Vorkuta, a notorious camp in the Gulag internment system that witnessed three pivotal moments in Russian history. In the 1930s, a desperate hunger strike by socialist prisoners, victims of Joseph Stalin’s repressive regime, resulted in mass executions. In 1953, a strike by forced labourers sounded the death knell for the Stalinist forced labour system. And finally, in the late 1980s and early 1990s, a series of strikes by new, independent miners’ unions were central to overturning the Stalinist system. Paul Kellogg uses the story of Vorkuta as a frame with which to re-assess the Russian Revolution. In particular, he turns to the contributions of Iulii Martov, a contemporary of Lenin, and his analysis of the central role played in the revolution by a temporary class of peasants-in-uniform. Kellogg explores the persistence and creativity of workers’ resistance in even the darkest hours of authoritarian repression and offers new perspectives on the failure of democratic governance after the Russian Revolution.

[The Romantic Manifesto](#) Ayn Rand 1971-10-01 In this beautifully written and brilliantly reasoned

book, Ayn Rand throws a new light on the nature of art and its purpose in human life. Once again Miss Rand eloquently demonstrates her refusal to let popular catchwords and conventional ideas stand between her and the truth as she has discovered it. The Romantic Manifesto takes its place beside *The Fountainhead* as one of the most important achievements of our time.

Aesthetics and Business Ethics Daryl Koehn 2013-09-03 Ludwig Wittgenstein famously said, "Ethics is aesthetics." It is unclear what such a claim might mean and whether it is true. This book explores contentious issues arising at the interface of ethics and aesthetics. The contributions reflect on the status of aesthetic and ethical judgments, the relation of aesthetic beauty and ethical goodness and art and character development. The book further considers the potential role art could play in ethical analysis and in the classroom and explores in what respects aesthetics and ethics might be intertwined and even mutually supportive.

Transhumanism David Livingstone 2015-09-02 Transhumanism is a recent movement that extols man's right to shape his own evolution, by maximizing the use of scientific technologies, to enhance human physical and intellectual potential. While the name is new, the idea has long been a popular theme of science fiction, featured in such films as *2001: A Space Odyssey*, *Blade Runner*, the *Terminator* series, and more recently, *The Matrix*, *Limitless*, *Her* and *Transcendence*. However, as its adherents hint at in their own publications, transhumanism is an occult project, rooted in Rosicrucianism and Freemasonry, and derived from the Kabbalah, which asserts that humanity is evolving intellectually, towards a point in time when man will become God. Modeled on the medieval legend of the Golem and Frankenstein, they believe man will be able to create life itself, in the form of living machines, or artificial intelligence. Spearheaded by the Cybernetics Group, the project resulted in both the development of the modern computer and MK-Ultra, the CIA's "mind-control"

program. MK-Ultra promoted the “mind-expanding” potential of psychedelic drugs, to shape the counterculture of the 1960s, based on the notion that the shamans of ancient times used psychoactive substances, equated with the “apple” of the Tree of Knowledge. And, as revealed in the movie Lucy, through the use of “smart drugs,” and what transhumanists call “mind uploading,” man will be able to merge with the Internet, which is envisioned as the end-point of Kabbalistic evolution, the formation of a collective consciousness, or Global Brain. That awaited moment is what Ray Kurzweil, a director of engineering at Google, refers to as The Singularity. By accumulating the total of human knowledge, and providing access to every aspect of human activity, the Internet will supposedly achieve omniscience, becoming the “God” of occultism, or the Masonic All-Seeing Eye of the reverse side of the American dollar bill.
