[Deadly Emotions](#) - Don Colbert 2006-05-06

Did you know that negative emotions can adversely affect your health? Depression, anger, guilt, condemnation, low self-esteem-these are only a few of the lethal toxins that threaten body and spirit. Offering a clear definition of deadly emotions-what they are, where they come from,

how they manifest themselves, and their effects on the body-Dr. Colbert uses scientific evidence to support his views. He further offers hope in the form of God's power to deliver readers from these toxins, focusing on the power of forgiveness and repentance, the value of a merry heart, and the joy of the Lord. Finally, Dr. Colbert shares insights on the role nutrition plays in removing the physical toxins that inhibit true health.

Daniel Goleman Omnibus - Daniel Goleman
2004

Emotional Intelligence Does IQ define our destiny? Daniel Goleman argues that our view of human intelligence is far too narrow, and that our emotions play a major role in thought, decision making and individual success. Self-awareness, impulse control, persistence, motivation, empathy and social deftness are all qualities that mark people who excel: whose relationships flourish, who are stars in the workplace. With new insights into the brain architecture underlying emotion and rationality, Goleman shows precisely how emotional intelligence can be nurtured and strengthened in all of us. Working with Emotional Intelligence Do you want to be more successful at work? Do you want to improve your chances of promotion? Do you want to get on better with your colleagues? Daniel Goleman draws on unparalleled access to business leaders around the world and the thorough research that is his trademark. He

demonstrates that emotional intelligence at work matters twice as much as cognitive abilities such as IQ or technical expertise in this inspiring sequel.

Toolkit for Counseling Spanish-Speaking Clients
- Lorraine T. Benuto 2017-11-14

This timely practical reference addresses the lack of Spanish-language resources for mental health professionals to use with their Latino clients. Geared toward both English- and Spanish-speaking practitioners in a variety of settings, this volume is designed to minimize misunderstandings between the clinician and client, and with that the possibility of inaccurate diagnosis and/or ineffective treatment. Coverage for each topic features a discussion of cultural considerations, guidelines for evidence-based best practices, a review of available findings, a treatment plan, plus clinical tools and client handouts, homework sheets, worksheets, and other materials. Chapters span a wide range of disorders and problems over the life-course, and

include reproducible resources for: Assessing for race-based trauma. Using behavioral activation and cognitive interventions to treat depression among Latinos. Treating aggression, substance use, abuse, and dependence among Latino Adults. Treating behavioral problems among Latino adolescents. Treating anxiety among Latino children. Working with Latino couples. Restoring legal competency with Latinos. The Toolkit for Counseling Spanish-Speaking Clients fills a glaring need in behavioral service delivery, offering health psychologists, social workers, clinical psychologists, neuropsychologists, and other helping professionals culturally-relevant support for working with this under served population. The materials included here are an important step toward dismantling barriers to mental health care.

Otherness in Hispanic Culture - Teresa

Fernandez Ulloa 2014-06-26

This book addresses contemporary discourses on a wide variety of topics related to the ideological and epistemological changes of the 19th, 20th and 21st centuries, and the ways in which they have shaped the Spanish language and cultural

manifestations in both Spain and Hispanic America. The majority of the chapters are concerned with 'otherness' in its various dimensions; the alien Other - foreign, immigrant, ethnically different, disempowered, female or minor - as well as the Other of different sexual orientation and/or ideology. Following Octavio Paz, otherness is expressed as the attempt to find the lost object of desire, the frustrating endeavour of the androgynous Plato wishing to embrace the other half of Zeus, who in his wrath, tore off from him. Otherness compels human beings to search for the complement from which they were severed. Thus a male joins a female, his other half, the only half that not only fills him but which allows him to return to the unity and reconciliation which is restored in its own perfection, formerly altered by divine will. As a result of this transformation, one can annul the distance that keeps us away from that which, not being our own, turns into a source of anguish. The clashing diversity of all

things requires the human predisposition to accept that which is different. Such a predisposition is an expression of epistemological, ethical and political aperture. The disposition to co-exist with the different is imagined in the de-anthropocentricization of the bonds with all living realms. And otherness is, in some way, the reflection of sameness (mismidad). The other is closely related to the

self, because the vision of the other implies a reflection about the self; it implies, consciously or not, a relationship with the self. These topics are addressed in this book from an interdisciplinary perspective, encompassing arts, humanities and social sciences.
