Power and Horizontality in South-South Development Cooperation. The Case of Brazil and Mozambique Jurek Seifert 2020-02-24 The growing importance of new actors in the global political landscape is envisaged as a phenomenon that has led to shifts in international power relations. This is reflected in development cooperation. Countries like China, Brazil, India and South Africa have enhanced their cooperation programs and present their development cooperation as South-South Development cooperation (SSDC) which takes place between countries of the 'Global South'. Both practitioners and scholars ascribe a notion of solidarity and horizontality to South-South cooperation that allegedly distinguishes it from the relationship patterns commonly associated with North-South

relations. However, power constellations between the emerging powers and most of their cooperation partners are often asymmetrical. This book asks whether the claim that South-South cooperation is conducted in a horizontal manner holds in practice in spite of these asymmetries. It revises the concept of South-South cooperation and identifies the central characteristics that are claimed to distinguish the Southern modality from Northern cooperation. It then investigates the relationship between Brazil and Mozambique during the period 2003-2014 to shed some light on the question whether South-South cooperation is different from 'traditional' development cooperation regarding the relations between cooperation partners. Jurek Seifert is a development cooperation expert. He holds a PhD from the University of Duisburg-Essen and has worked on South-South cooperation, development effectiveness and private sector engagement. He has conducted research at the BRICS Policy Center in Rio de Janeiro, Brazil, and works in international development cooperation.

REBT with Diverse Client Problems and Populations Windy Dryden 2019-02-26 This practice-focused resource demonstrates effective uses of Rational Emotive Behavior Therapy methods and techniques in treating clients across various conditions, settings, and subgroups. Client problems featured include both those often associated with REBT (e.g., anxiety, depression, anger) and others noted for complex presentations, difficulties with engagement, and impasses (e.g., addictions, suicidality, psychosis). Challenging treatment populations are covered as well, including women, couples, families, elder and pediatric clients, clients with disabilities, and sexual minorities. These stimulating cases show how well the diversity of clients and their concerns is matched by the flexibility of techniques and applications within REBT. In each chapter, expert therapists:

- Identify concepts in REBT especially suited to approaching the problem or population.
- Outline best REBT practices in assessment and treatment of the client(s).
- Survey evidence-based non-REBT approaches most useful in complementing REBT.
- Provide a brief case example representing appropriate REBT in action.
- Assess their use of REBT in treating the problem or members of the population.

A bedrock text for REBT scholar-practitioners, *REBT with Diverse Populations and Problems* is a testimony to the continuing usefulness of the therapy and its adaptability as client populations emerge and as the contexts of client problems evolve in response to a demanding world.

The Essentials of Airplane Maintenance Michael Loong 2015-01-28 How can a CEO spend creative energy to improve the performance of his organization instead of spending patch-up energy to quick-fix symptoms of problems? How can he develop a balanced, proactive plan (like a yin-yang relationship) so that his managers can properly manage their portfolios according to the company's aims and objectives? The heart of *The Essentials of Airplane Maintenance* addresses issues concerning how to set up and manage an engineering and maintenance organization with all necessary facilities, departments, procedures in place, and staffing. Running an airline business in the current global environment is not meant for the fainthearted person or novice. The operation is complex and risky. In *The Essentials of Airplane Maintenance*, author Michael Loong provides practical information to the new and practicing engineers, engineering, and maintenance managers and CEOs of airlines. His philosophical approach to solving practical problems is enlightening and pragmatic, not only for the airlines, but also for the aviation suppliers. In order to achieve reliability and safe operation of airplanes, he advocates applying economic theory in managing engineering repair and replacement procedures instead of following the book blindly. It is a must-read book to achieve success in the dynamic, complex world of airline operations.

Winning with People John C. Maxwell 2007-04-01 The most important characteristic that is needed to be successful in any leadership position - whether it's in business, church, or your community - is the ability to work with people. Relationships are at the heart of every positive human experience. John C. Maxwell, a master communicator and relational expert, makes learning about relationships accessible to everyone in *Winning With People*. Within this book, Maxwell has translated decades of experience into 25 People Principles that anyone can learn. In *Winning With People*, Maxwell divides these principles into sections based off different questions we must ask ourselves such as:

Readiness: Are we prepared for relationships? Connection: Are we willing to focus on others? Trust: Can we build mutual trust? Investment: Are we willing to invest in others? Synergy: Can we create a win-win relationship? Each section contains guiding People Principles. Some are intuitive, such as The Lens Principle: Who We Are Determines How We See Others. Others may go against your instincts, such as The Confrontation Principle: Caring for People Should Precede Confronting People. The most sophisticated leaders and salespeople will pick up on skills that will make them even better, and relational novices will learn skills that can transform them into relational dynamos.

Caring Matters Sarah W. Fraser 2005-01-05 This book is about how healthcare providers need to remember that at their heart they are healing individuals and organisations. And, to do this effectively, they need to be aware of how the people working within the organisations behave. Behaviours are the tangible manifestations of organisation culture. People who continually espouse how important it is to get organisational culture right sometimes ignore an essential truth; that behaviour and culture are synonymous. Consequently, an organisation in which individuals are behaving in the same way today as they did yesterday hasn't changed its culture. And, if cultural transformation is our goal, we have no choice but to focus on changing behaviour. Why do we stress 'no choice? As we shall demonstrate throughout this book, behaving well towards each other is not just to make us feel good, although that is important enough. Otherwise there is little reason to come to work except to earn a living: Behaviour affects performance, the number of errors, the costs of healthcare and more. So managing behaviour is not a soft option; it affects hard outcomes, and is hard to do. We are not simply talking about feeling better about each other. We are talking about changing the way each and every one of us behaves towards each other. We need to remember that we are in the caring trade; and that begins with caring for each other.

ABC's of Relationship Selling Through Service Charles Futrell 2006 The Third Canadian Edition of ABC's of Relationship Selling explores professional selling from a Canadian perspective. As the title of the book suggests, the text is centred around a philosophy about selling: that success requires mastery of selling basics, including selecting presentation styles, and effective closing techniques. In addition, other key topics such as ethics and territory management are explored. Although Futrell has traditionally been seen as the "relationship" book, and Manning has been called the "strategy" book, this division is no longer as cut and dry. In the current edition, Manning has moved more toward a relationship-based approach, moving to include a sales management chapter at the end of their text (including Intro Selling, Professional Selling, and Negotiations). Manning users cite the consultative model process used throughout as one of its key strengths on the strategy side. Through extensive reviewing, four key elements have been identified as the most difficult for students to learn and instructors to teach. It is these four key elements which directed the revision of this edition: Beginning the Sale, Closing the Sale, Handling Objections, and Ethics/Integrity-based selling.
