Good Robot, Bad Robot Jo Ann Oravec 2022-09-30 This book explores how robotics and artificial intelligence (AI) can enhance human lives but also have unsettling "dark sides." It examines expanding forms of negativity and anxiety about robots, AI, and autonomous vehicles as our human environments are reengineered for intelligent military and security systems and for optimal workplace and domestic operations. It focuses on the impacts of initiatives to make robot interactions more humanlike and less creepy (as with domestic and sex robots). It analyzes the emerging resistances against these entities in the wake of omnipresent AI applications (such as "killer robots" and ubiquitous surveillance). It unpacks efforts by developers to have ethical and social influences on robotics and AI, and confronts the AI hype that is designed to shield the entities from criticism. The book draws from science fiction, dramaturgical, ethical, and legal literatures as well as current research agendas of corporations. Engineers, implementers, and researchers have often encountered users' fears and aggressive actions against intelligent entities, especially in the wake of deaths of humans by robots and autonomous vehicles. The book is an invaluable resource for developers and researchers in the field, as well as curious readers who want to play proactive roles in shaping future technologies.

DarkFire Continuum E W Farnsworth 2017-03-11 Since the appearance of E. W. Farnsworth's 'DarkFire at the Edge of Time' in early 2016, the importance of Artificial Intelligence (AI) has increased exponentially. From AI to robotics, 2016 was long prophesied as the year when the machines would start "taking over", Now it is happening, according to Vivek Wadhwa of Crunch Network. Yet AIs and robots have come as our friends and helpmeets to improve our lives. They will become, as Lincoln wrote, the "better angels of our nature." From the 'Sarah Tetralogy' through the journey of Spaceship Arcturus conveying brilliant humans, artificial intelligences and avatars beyond the end of the universe, to 'Renaissance', which recounts the spaceship's successful return to instantiate a new Eden which replaces the black crisp that humans have made of Earth, these stories continue in the vein of DarkFire and his friend, the inimitable Loc Phuket. Science Fiction to some, perhaps, yet, day by day, increasingly part of our current events.

Robot Sex John Danaher 2018-09-11 Perspectives from philosophy, psychology religious studies, economics, and law on the possible future of robot-human sexual relationships. Sexbots are coming. Given the pace of technological advances, it is inevitable that realistic robots specifically designed for people's sexual gratification will be developed in the not-too-distant future. Despite popular culture's fascination with the topic, and the emergence of the much-publicized Campaign Against Sex Robots, there has been little academic research on the social, philosophical, moral, and legal implications of robot sex. This book fills the gap, offering perspectives from philosophy, psychology, religious studies, economics, and law on the possible future of robot-human sexual relationships. Contributors discuss what a sex robot is, if they exist, why we should take the issue seriously, and what it means to "have sex" with a robot. They make the case for developing sex robots, arguing for their beneficial nature, and the case against it, on religious and moral grounds; they consider the subject from the robot's perspective, addressing such issues as consent and agency; and they ask whether it is possible for a human to form a mutually satisfying, loving relationship with a robot. Finally, they speculate about the future of human-robot sexual interaction, considering the social acceptability of sex robots and the possible effect on society. Contributors Marina Adshade, Thomas Arnold, Julie Carpenter, John Danaher, Brian Earp, Lily Eva Frank, Joshua Goldstein, Michael Hauskeller, Noreen Herzfeld, Neil McArthur, Mark Migotti, Sven Nyholm, Ezio di Nucci, Steve Petersen, Anders Sandberg, Matthias Scheutz, Litska Strikwerda, Nicole Wyatt

Shadows Over Sundials C. Stephen Baldwin 2009-10-31 Lost in the dusty Inca ruins of Peru at age 6, tattooed by head-hunters in the jungles of

Borneo at age 12, luxuriated lasciviously and flirted with pro-Castro revolutionaries in a corrupt pre-Castro Havana, wrestled a Bengal tiger, lived beneath the iron curtain's shadow in occupied Trieste, witnessed the astounding mid-hurricane Atlantic rescue of hundreds of passengers and sailors from a burning ship. An atypical upbringing meant atypical experiences. Stephen Baldwin's ordinary world involved living with very rich and very famous relatives and friends, including Adlai Stevenson, Richard Nixon, and the Washington Post's Phil and Kaye Graham. He explored virtually unknown temples in Angkor and Rangoon, routinely crisscrossed oceans in luxury liners that fully lived up to their promise, ran with the bulls in Pamplona when he was 20, was instrumental in saving thousands clinging to life after a cataclysmic tidal wave and cyclone in Bangladesh, then in setting up an underground railway for Bengali leaders escaping from Pakistani genocide, finally escaping to carry that story to the outside world. It is true that there are few undiscovered wildernesses today. Transportation and communication advances have blazingly brought everything close to us, but in that process nearly everything has been rendered commonplace. Yet much of the world was neither close nor common a mere 60 years ago, and Stephen had a front row seat to the spectacle-sometimes getting too close to the fire. *Shadows Over Sundials* chronicles the astonishing adventures of a Foreign Service brat who later worked in poor countries for The Ford Foundation, Population Council, and United Nations, spearheading international development, then went on to tackle seemingly intractable problems in inner-city education, first as a New York City Teaching Fellow in a failing South Bronx elementary school, finally as Board Chair of a charter school he helped establish there to do it better. Mr. Baldwin is married to Barbara Radloff, has five children, and lives in New York City and Redding, Connecticut.

DarkFire E W Farnsworth 2016-02-26 E W Farnsworth's *DarkFire at the Edge of Time* brings together twenty-five visionary science fiction stories focusing on events leading up to and following the launch of the Spaceship Arcturus, destined to an epic voyage through space to the edge of the universe and back again. Avatars and AIs mature by programming themselves and acquiring human characteristics as they discover romance, sex, joy and pain. While alluding to works by Arthur C Clarke, Isaac Asimov, Norbert Wiener, H P Lovecraft and Alan Turing, Farnsworth's brainy stories break new ground. Amongst the twenty-five stories, "The Joys of Rayovision" explores early experimentation in teleportation; "Shell Game" features using DNA for encoding messages in outer space; and numerous other stories postulate the practicality of a neutrino communicator. The reader can read sequentially or delve into this collection in any direction. The variety of perspectives caters for every mood, inclination and intellectual capacity. *LIFE* 1957-01-07 *LIFE Magazine* is the treasured photographic magazine that chronicled the 20th Century.
