Soon Ember could be engulfed by darkness-But when two children, Lina and Doon, discover fragments of an ancient parchment, they begin to wonder if there could be a way out of Ember. The People of Sparks - Jeanne DuPrau 2009-07-28

When the people of the underground city of Ember follow Lina and Doon to the surface, little prepares them for what they will encounter. Leaving behind the darkness that has been their home for generations, they discover a world of colour, warmth and light. The people of the small village of Sparks seem willing to help them . . . at first . . . but life on the surface has it's dark side too. Before long the villagers of Sparks become more reluctant to share their precious resources with the strange, new underground people. Lina and Doon watch in horror as the differences between the two groups grow into resentment, anger and hate. Somehow

they must help overcome the distrust and bring the people of Ember and Sparks together.

*Les Misérables* - Victor Hugo 2020-08-05

Valjean volunteers to execute Javert himself, and Enjolras grants permission. Valjean takes Javert out of sight, and then shoots into the air while letting him go. Marius mistakenly believes that Valjean has killed Javert. As the barricade falls, Valjean carries off the injured and unconscious Marius. All the other students are killed. Valjean escapes through the sewers, carrying Marius's body. He evades a police patrol, and reaches an exit gate but finds it locked. Thénardier emerges from the darkness. Valjean recognizes Thénardier, but Thénardier does not recognize Valjean. Thinking Valjean a murderer lugging his victim's corpse, Thénardier offers to open the gate for money. As he searches Valjean and Marius's pockets, he surreptitiously tears off a piece of Marius's coat so he can later find out his identity. Thénardier takes the thirty francs he finds, opens the gate, and allows Valjean to leave, expecting Valjean's emergence from the sewer will distract the police who have been pursuing him.

**The Republic of Venice in the 18th Century** - Walter Panciera  
2021-07-22T15:36:00+02:00

This book traces the last century of life of the Republic of Venice. It aims to show why the "Serenissima", unlike large countries such as France or England, was not on the way to becoming a modern nation. Until its end, the city of Venice never took the shape of a real national capital, but remained the dominant centre linking wide-ranging and diverse territories around the Adriatic. The particularism, or rather polycentrism, of its state apparatus is the key to understanding its limitations, as well as the legacy left in Venice's vast domains, reaching from Corfu to Lombardy. In the 18th century the Republic was weak compared to the great European states. Its institutions and leadership had been frozen for two centuries and there was no political reform, although Enlightenment culture diffused widely over the century. On the economic level, however, there was little sign of "decay": merchant traffic continued to prosper and there were a number of new developments in the manufacturing sphere.

Down to Earth - Ted Steinberg 2002-05-09

In this ambitious and provocative text, environmental historian Ted Steinberg offers a sweeping history of our nation—a history that, for the first time, places the environment at the very center of our story. Written with exceptional clarity, *Down to Earth* re-envision the story of America "from the ground up." It reveals how focusing on plants, animals, climate, and other ecological factors can radically change the way that we think about the past. Examining such familiar topics as colonization, the industrial revolution, slavery, the Civil War, and the emergence of modern-day consumer culture, Steinberg recounts how the natural world influenced the course of human history. From the colonists' attempts to impose order on the land to modern efforts to sell the wilderness as a consumer good, the author reminds readers that many critical episodes in our history were, in fact, environmental events. He highlights the ways in which we have attempted to reshape and control nature, from Thomas Jefferson's surveying plan, which divided the national landscape into a grid, to the transformation of animals, crops, and even water into commodities. The text is ideal for courses in environmental history, environmental studies, urban studies, economic history, and American history. Passionately argued and thought-provoking, *Down to Earth* retells our nation's history with nature in the foreground—a perspective that will challenge our view of everything from Jamestown to Disney World.

Man's Higher Consciousness - Prof. Hilton Hotema 2016-01-18

In this book, first published in 1962, Professor Hilton Hotema provides his insights into how we could all live longer by learning the body's simple requirements of breathing fresh air, avoiding animal flesh, banning any cooked food, and by gradually lessening the amount of food consumed. Hotema firmly believes that breathing fresh air and consuming organic fruits and natural organic liquids alone could extend our lives and also lays bare his secret that what kills at an early age is not the illusion of time, but rather overeating, breathing in toxic, unclean air, and elements such as electronic radiation, dirty electricity and medications. A must-read for any health-conscious individual.

**Plants and Politics in Padua During the Age of Revolution, 1820-1848** - Ariane Dröscher 2021-10-22

This book highlights the close interactions between plants, plant knowledge, politics, and social life in Padua during the age of revolution. It explores the lives and thoughts of two brothers, the lawyer Andrea Meneghini and the botanist Giuseppe Meneghini, illustrating the unspoken dreams of progress and a new social order, but also sheds light on the ambiguous relationship between the Paduan elite and Austrian rule before the 1848 revolution. A closer look at park designs, gardening associations and networks, flower exhibitions, agricultural societies, organicist metaphors, and botanical research on the organization of living bodies opens up unexpected parallels between actors and ideas of

two apparently distant areas: botany and political economy.

**The Guerilla Chief and Other Tales** - Mayne Reid 1871

*The Cactus Eaters* - Dan White 2009-10-13

"In the well-written, laugh-out-loud, self-deprecating spirit of Bill Bryson's *A Walk In the Woods* and Nora Ephron's *When Harry Met Sally*, Dan White takes us along for a walk on the wild side of adventure and love. I couldn't put it down." —Eric Blehm, *National Outdoor Book Award*-winning author of *The Last Season* When Dan White and his girlfriend Melissa set out to hike the Pacific Crest Trail, which stretches from Mexico to Canada through boiling desert and snowcapped mountain passes, his parents wondered how two people who had never shared an apartment could survive in a tent in the desert. But when Dan and Melissa, dubbed "The Lois and Clark Expedition" by a fellow hiker, quit their doldrum jobs to set out into the wilderness, the hardships of the trail provided these addled adventurers with a crystalline view of the American wilderness, themselves, and each other. In his wickedly funny memoir, Dan White also shares the story of Warren Rogers, who risked ruin to chart the trail during the Great Depression. As he walks in Rogers' footsteps, he starts to wonder if he's assumed the man's bravery—or his insanity. Both hilarious and harrowing, this account of a young couple's hike along the 2,650-mile Pacific Crest Trail is a testament to the power of nature to change us and the power of love to get us through the uphill climbs.
