Different: Gender Through the Eyes of a Primatologist - Frans de Waal 2022-04-05

"Every new book by Frans de Waal is a cause for excitement, and this one is no different. A breath of fresh air in the cramped debate about the differences between men and women. Fascinating, nuanced, and very timely." —Rutger Bregman, author of *Humankind: A Hopeful History* In *Different*, world-renowned primatologist Frans de Waal draws on decades of observation and studies of both human and animal behavior to argue that despite the linkage between gender and biological sex, biology does not automatically support the traditional gender roles in human societies. While humans and other primates do share some behavioral differences, biology offers no justification for existing gender inequalities. Using chimpanzees and bonobos to illustrate this point—two ape relatives that are genetically equally close to humans—de Waal challenges widely held beliefs about masculinity and femininity, and common assumptions about authority, leadership, cooperation, competition, filial bonds, and sexual behavior. Chimpanzees are male-dominated and violent, while bonobos are female-dominated and peaceful. In both species, political power needs to be distinguished from physical dominance. Power is not limited to the males, and both sexes show true leadership capacities. *Different* is a fresh and thought-provoking approach to the long-running debate about the balance between nature and nurture, and where sex and gender roles fit in. De Waal peppers his discussion with details from his own life—a Dutch childhood in a family of six boys, his marriage to a French woman with a different orientation toward gender, and decades of academic turf wars over outdated scientific theories that have proven hard to dislodge from public discourse. He discusses sexual orientation, gender identity, and the limitations of the gender binary, exceptions to which are also found in other primates. With humor, clarity, and compassion, *Different* seeks to broaden the conversation about human gender dynamics by promoting an inclusive model that embraces differences, rather than negating them.

Encyclopedia of Animal Cognition and Behavior - Jennifer Vonk 2022-04-01

This encyclopedia, representing one of the most multi-disciplinary areas of research, is a comprehensive examination of the key areas in animal cognition and behavior. It will serve as a complementary resource to the handbooks and journals that have emerged in the last decade on this topic, and will be a useful resource for student and researcher alike.

With comprehensive coverage of this field, key concepts will be explored. These include social cognition, prey and predator detection, habitat selection, mating and parenting, development, genetics, physiology, memory, learning and perception. Attention is also given to animal-human co-evolution and interaction, and animal welfare. All entries are under the purview of acknowledged experts in the field.

Experiments in Plant Hybridisation - Gregor Mendel 2008-11-01

Experiments which in previous years were made with ornamental plants have already afforded evidence that the hybrids, as a rule, are not exactly intermediate between the parental species. With some of the more striking characters, those, for instance, which relate to the form and size of the leaves, the pubescence of the several parts, etc., the intermediate, indeed, is nearly always to be seen; in other cases, however, one of the two parental characters is so preponderant that it is difficult, or quite impossible, to detect the other in the hybrid. from 4. The Forms of the Hybrid One of the most influential and important scientific works ever written, the 1865 paper *Experiments in Plant Hybridisation* was all but ignored in its day, and its author, Austrian priest and scientist GREGOR JOHANN MENDEL (1822-1884), died before seeing the dramatic long-term impact of his work, which was rediscovered at the turn of the 20th century and is now considered foundational to modern genetics. A simple, eloquent description of his 1856-1863 study of the inheritance of traits in pea plants Mendel analyzed 29,000 of them this is essential reading for biology students and readers of science history. Cosimo presents this compact edition from the 1909 translation by British geneticist WILLIAM BATESON (1861-1926).

Chromosome identification: Medicine and Natural Sciences - Torbjørn Caspersson 1973-01-01

Chromosome Identification—Technique and Applications in Biology and Medicine contains the proceedings of the Twenty-Third Nobel

Symposium held at the Royal Swedish Academy of Sciences in Stockholm, Sweden, on September 25-27, 1972. The papers review advances in chromosome banding techniques and their applications in biology and medicine. Techniques for the study of pattern constancy and for rapid karyotype analysis are discussed, along with cytological procedures; karyotypes in different organisms; somatic cell hybridization; and chemical composition of chromosomes. This book is comprised of 51 chapters divided into nine sections and begins with a survey of the cytological procedures, including fluorescence banding techniques, constitutive heterochromatin (C-band) technique, and Giemsa banding technique. The following chapters explore computerized statistical analysis of banding pattern; the use of distribution functions to describe integrated profiles of human chromosomes; the uniqueness of the human karyotype; and the application of somatic cell hybridization to the study of gene linkage and complementation. The mechanisms for certain chromosome aberration are also analyzed, together with fluorescent banding agents and differential staining of human chromosomes after oxidation treatment. This monograph will be of interest to practitioners in the fields of biology and medicine.

Studies in Spermatogenesis (Part 1 of 2) - Nettie Maria Stevens 2020-08-12

Reproduction of the original: *Studies in Spermatogenesis (Part 1 of 2)* by Nettie Maria Stevens

Glossary of Biotechnology and Genetic Engineering - Food and Agriculture Organization of the United Nations 1999

An up-to-date list of terms currently in use in biotechnology, genetic engineering and allied fields. The terms in the glossary have been selected from books, dictionaries, journals and abstracts. Terms are included that are important for FAO's intergovernmental activities, especially in the areas of plant and animal genetic resources, food quality and plant protection.

Sex Differences in Brain and Behavior - Cynthia L. Jordan 2022

"The extent to which there are differences between the sexes is an area of interest to physiologists, neuroscientists, and clinicians, as well as social scientists and the general public. This book examines recent research on the biological basis of sex differences, including differences in the brain, behavior, the immune system, and disease states"--

Life - David E. Sadava 2013-04-01

Laboratory Exercises in Zoology - H. S. Luker 2013-10-22

Laboratory Exercises in Zoology serves as a teaching aid for students studying for Advanced level Zoology or Biology. This book provides exercises concerned mainly with physiology and some dissection techniques. Organized into 12 parts, this book begins with an overview of diffusion of molecules or ions from a region of high concentration to a region of relatively low concentration. This text then discusses the breakdown of complex molecules, which is achieved by a series of hydrolyses catalyzed by the digestive enzymes produced by the glandular cells of the digestive system. Other chapters consider the various stages involved in making permanent stained preparations. This book discusses as well the requirements for animals in the laboratory. The final chapter deals with the rate of growth of an organism. This book is a valuable resource for students studying zoology and biology. Teachers and biology laboratory technicians will also find this book extremely useful.

Sex-linked Inheritance in Drosophila - Thomas Hunt Morgan 2022-08-10

The following book was written by Thomas Hunt Morgan and Calvin Bridges, and made the former world-famous. It was in the studies covered in the following publication that Morgan discovered that genes are carried on chromosomes and are the mechanical basis of heredity. These discoveries formed the basis of the modern science of genetics; and he would later win the Nobel Prize in Physiology or Medicine in 1933 for his findings.

The Science of Zoology - James C. Perry 1952

The Evolution of Sex Determination - Leo W. Beukeboom 2014 temperature) or social variables (e.g.

Lecture Notes: Zoology PDF Book (Zoology eBook Download) - Arshad Iqbal

The Book Zoology Lecture Notes PDF Download (Zoology eBook 2023-24): Textbook Notes Chapter 1-20 & Class Questions and Answers (Class 11-12 Zoology PDF Notes & Online Books Download) includes worksheets to solve problems with hundreds of class questions. "Zoology Lecture Notes Chapter 1-20" PDF book covers basic concepts and analytical assessment tests. Zoology Notes PDF book helps to practice workbook questions from exam prep notes. Zoology Textbook PDF Notes with answers key includes study material with verbal, quantitative, and analytical past papers quiz questions. Zoology Questions and Answers PDF download, a book to review practice questions and answers on chapters: Behavioral ecology, cell division, cells, tissues, organs and systems of animals, chemical basis of animals life, chromosomes and genetic linkage, circulation, immunity and gas exchange, ecology: communities and ecosystems, ecology: individuals and populations, embryology, endocrine system and chemical messenger, energy and enzymes, inheritance patterns, introduction to zoology, molecular genetics: ultimate cellular control, nerves and nervous system, nutrition and digestion, protection, support and movement, reproduction and development, senses and sensory system, zoology and science worksheets for college and university revision notes. Zoology Notes PDF Download, free eBook's sample covers beginner's questions, textbook's study notes to practice worksheets. The eBook Zoology Notes Chapter 1-20 PDF includes high school workbook questions to practice worksheets for exam. Zoology Study Guide, a textbook revision guide with chapters' notes for competitive exam. Zoology Class Notes PDF digital edition eBook to review problem solving exam tests from zoology practical and textbook's chapters as: Chapter 1: Behavioral Ecology Notes Chapter 2: Cell Division Notes Chapter 3: Cells, Tissues, Organs and Systems of Animals Notes Chapter 4: Chemical Basis of Animals Life Notes Chapter 5: Chromosomes and Genetic Linkage Notes Chapter 6: Circulation, Immunity and Gas Exchange Notes Chapter 7: Ecology: Communities and Ecosystems Notes Chapter 8: Ecology: Individuals and Populations Notes Chapter 9: Embryology Notes Chapter 10: Endocrine System and Chemical Messenger Notes Chapter 11: Energy and Enzymes Notes Chapter 12: Inheritance Patterns Notes Chapter 13: Introduction to Zoology Notes Chapter 14: Molecular Genetics: Ultimate Cellular Control Notes Chapter 15: Nerves and Nervous System Notes Chapter 16: Nutrition and Digestion Notes Chapter 17: Protection, Support and Movement Notes Chapter 18: Reproduction and Development Notes Chapter 19: Senses and Sensory System Notes Chapter 20: Zoology and Science Notes Study Behavioral Ecology Notes PDF, book chapter 1 lecture notes with class questions: Approaches to animal behavior, and development of behavior. Study Cell Division Notes PDF, book chapter 2 lecture notes with class questions: meiosis: Basis of sexual reproduction, mitosis: cytokinesis and cell cycle. Study Cells, Tissues, Organs and Systems of Animals Notes PDF, book chapter 3 lecture notes with class questions: What are cells. Study Chemical Basis of Animals Life Notes PDF, book chapter 4 lecture notes with class questions: Acids, bases and buffers, atoms and elements: building blocks of all matter, compounds and molecules: aggregates of atoms, and molecules of animals. Study Chromosomes and Genetic Linkage Notes PDF, book chapter 5 lecture notes with class questions: Approaches to animal behavior, evolutionary mechanisms, organization of DNA and protein, sex chromosomes and autosomes, species, and speciation. Study Circulation, Immunity and Gas Exchange Notes PDF, book chapter 6 lecture notes with class questions: Immunity, internal transport, and circulatory system. Study Ecology: Communities and Ecosystems Notes PDF, book chapter 7 lecture notes with class questions: Community structure, and diversity. Study Ecology: Individuals and Populations Notes PDF, book chapter 8 lecture notes with class questions: Animals and their abiotic environment, interspecific competition, and interspecific interactions. Study Embryology Notes PDF, book chapter 9 lecture notes with class questions: Amphibian embryology, echinoderm embryology, embryonic development, cleavage and egg types, fertilization, and vertebrate embryology. Study Endocrine System and Chemical Messenger Notes PDF, book chapter 10 lecture notes with class questions: Chemical messengers, hormones and their feedback systems, hormones of invertebrates, hormones of vertebrates: birds and mammals. Study Energy and Enzymes Notes PDF, book chapter 11 lecture notes with class questions: Enzymes: biological catalysts, and what is energy. Study Inheritance Patterns Notes PDF, book chapter 12 lecture notes with class questions: Birth of modern genetics. Study Introduction to Zoology Notes PDF, book chapter 13 lecture notes with class questions: Glycolysis: first phase of nutrient metabolism, historical perspective, homeostasis, and temperature regulation. Study Molecular

Genetics: Ultimate Cellular Control Notes PDF, book chapter 14 lecture notes with class questions: Applications of genetic technologies, control of gene expression in eukaryotes, DNA: genetic material, and mutations. Study Nerves and Nervous System Notes PDF, book chapter 15 lecture notes with class questions: Invertebrates nervous system, neurons: basic unit of nervous system, and vertebrates nervous system. Study Nutrition and Digestion Notes PDF, book chapter 16 lecture notes with class questions: Animal's strategies for getting and using food, and mammalian digestive system. Study Protection, Support and Movement Notes PDF, book chapter 17 lecture notes with class questions: Amoeboid movement, an introduction to animal muscles, bones or osseous tissue, ciliary and flagellar movement, endoskeletons, exoskeletons, human endoskeleton, integumentary system of invertebrates, integumentary system of vertebrates, integumentary systems, mineralized tissues and invertebrates, muscular system of invertebrates, muscular system of vertebrates, non-muscular movement, skeleton of fishes, skin of amphibians, skin of birds, skin of bony fishes, skin of cartilaginous fishes, skin of jawless fishes, skin of mammals, and skin of reptiles. Study Reproduction and Development Notes PDF, book chapter 18 lecture notes with class questions: Asexual reproduction in invertebrates, and sexual reproduction in vertebrates. Study Senses and Sensory System Notes PDF, book chapter 19 lecture notes with class questions: Invertebrates sensory reception, and vertebrates sensory reception. Study Zoology and Science Notes PDF, book chapter 20 lecture notes with class questions: Classification of animals, evolutionary oneness and diversity of life, fundamental unit of life, genetic unity, and scientific methods.

Zoology MCQ PDF Book (Zoology eBook Download) - Arshad Iqbal 2020

The Book Zoology MCQ PDF Download (Zoology eBook 2023-24): MCQ Questions Chapter 1-20 & Practice Tests with Answer Key (Class 11-12 Zoology MCQs Book & Online PDF Download) includes revision guide for problem solving with hundreds of solved MCQs. Zoology MCQ with Answers PDF book covers basic concepts, analytical and practical assessment tests. "Zoology MCQ" PDF book helps to practice test questions from exam prep notes. Zoology MCQs Book includes revision guide with verbal, quantitative, and analytical past papers, solved MCQs. Zoology Multiple Choice Questions and Answers (MCQs) PDF Download, an eBook covers solved quiz questions and answers on chapters: Behavioral ecology, cell division, cells, tissues, organs and systems of animals, chemical basis of animals life, chromosomes and genetic linkage, circulation, immunity and gas exchange, ecology: communities and ecosystems, ecology: individuals and populations, embryology, endocrine system and chemical messenger, energy and enzymes, inheritance patterns, introduction to zoology, molecular genetics: ultimate cellular control, nerves and nervous system, nutrition and digestion, protection, support and movement, reproduction and development, senses and sensory system, zoology and science tests for college and university revision guide. Zoology Quiz Questions and Answers PDF download, free eBook's sample covers beginner's solved questions, textbook's study notes to practice online tests. The eBook Zoology MCQs Chapter 1-20 PDF includes high school question papers to review practice tests for exams. Zoology Multiple Choice Questions (MCQ) with Answers PDF digital edition eBook, a study guide with textbook chapters' tests for NEET/Jobs/Entry Level competitive exam. Class 11, 12 Zoology Practice Tests Chapter 1-20 eBook covers problem solving exam tests from zoology textbook and practical book's chapters as: Chapter 1: Behavioral Ecology MCQ Chapter 2: Cell Division MCQ Chapter 3: Cells, Tissues, Organs and Systems of Animals MCQ Chapter 4: Chemical Basis of Animals Life MCQ Chapter 5: Chromosomes and Genetic Linkage MCQ Chapter 6: Circulation, Immunity and Gas Exchange MCQ Chapter 7: Ecology: Communities and Ecosystems MCQ Chapter 8: Ecology: Individuals and Populations MCQ Chapter 9: Embryology MCQ Chapter 10: Endocrine System and Chemical Messenger MCQ Chapter 11: Energy and Enzymes MCQ Chapter 12: Inheritance Patterns MCQ Chapter 13: Introduction to Zoology MCQ Chapter 14: Molecular Genetics: Ultimate Cellular Control MCQ Chapter 15: Nerves and Nervous System MCQ Chapter 16: Nutrition and Digestion MCQ Chapter 17: Protection, Support and Movement MCQ Chapter 18: Reproduction and Development MCQ Chapter 19: Senses and Sensory System MCQ Chapter 20: Zoology and Science MCQ Practice Behavioral Ecology MCQ PDF, book chapter 1 test to solve MCQ questions: Approaches to animal behavior, and development of behavior. Gene Drives on the Horizon - National Academies of Sciences, Engineering, and Medicine 2016-08-28

Research on gene drive systems is rapidly advancing. Many proposed applications of gene drive research aim to solve environmental and public health challenges, including the reduction of poverty and the burden of vector-borne diseases, such as malaria and dengue, which disproportionately impact low and middle income countries. However, due to their intrinsic qualities of rapid spread and irreversibility, gene drive systems raise many questions with respect to their safety relative to public and environmental health. Because gene drive systems are designed to alter the environments we share in ways that will be hard to anticipate and impossible to completely roll back, questions about the ethics surrounding use of this research are complex and will require very careful exploration. Gene Drives on the Horizon outlines the state of knowledge relative to the science, ethics, public engagement, and risk assessment as they pertain to research directions of gene drive systems and governance of the research process. This report offers principles for responsible practices of gene drive research and related applications for use by investigators, their institutions, the research funders, and

regulators.

American Alligator - 1995

Genes, Behavior, and the Social Environment - Institute of Medicine 2006-12-07

Over the past century, we have made great strides in reducing rates of disease and enhancing people's general health. Public health measures such as sanitation, improved hygiene, and vaccines; reduced hazards in the workplace; new drugs and clinical procedures; and, more recently, a growing understanding of the human genome have each played a role in extending the duration and raising the quality of human life. But research conducted over the past few decades shows us that this progress, much of which was based on investigating one causative factor at a time—often, through a single discipline or by a narrow range of practitioners—can only go so far. Genes, Behavior, and the Social Environment examines a number of well-described gene-environment interactions, reviews the state of the science in researching such interactions, and recommends priorities not only for research itself but also for its workforce, resource, and infrastructural needs.

Handbook of Statistical Genetics - David J. Balding 2008-06-10

The Handbook for Statistical Genetics is widely regarded as the reference work in the field. However, the field has developed considerably over the past three years. In particular the modeling of genetic networks has advanced considerably via the evolution of microarray analysis. As a consequence the 3rd edition of the handbook contains a much expanded section on Network Modeling, including 5 new chapters covering metabolic networks, graphical modeling and inference and simulation of pedigrees and genealogies. Other chapters new to the 3rd edition include Human Population Genetics, Genome-wide Association Studies, Family-based Association Studies, Pharmacogenetics, Epigenetics, Ethic and Insurance. As with the second Edition, the Handbook includes a glossary of terms, acronyms and abbreviations, and features extensive cross-referencing between the chapters, tying the different areas together. With heavy use of up-to-date examples, real-life case studies and references to web-based resources, this continues to be must-have reference in a vital area of research. Edited by the leading international authorities in the field. David Balding - Department of Epidemiology & Public Health, Imperial College An advisor for our Probability & Statistics series, Professor Balding is also a previous Wiley author, having written Weight-of-Evidence for Forensic DNA Profiles, as well as having edited the two previous editions of HSG. With over 20 years teaching experience, he's also had dozens of articles published in numerous international journals. Martin Bishop - Head of the Bioinformatics Division at the HGMP Resource Centre As well as the first two editions of HSG, Dr Bishop has edited a number of introductory books on the application of informatics to molecular biology and genetics. He is the Associate Editor of the journal Bioinformatics and Managing Editor of Briefings in Bioinformatics. Chris Cannings - Division of Genomic Medicine, University of Sheffield With over 40 years teaching in the area, Professor Cannings has published over 100 papers and is on the editorial board of many related journals. Co-editor of the two previous editions of HSG, he also authored a book on this topic.

Assessing Genetic Risks - Institute of Medicine 1994-01-01

Raising hopes for disease treatment and prevention, but also the specter of discrimination and "designer genes," genetic testing is potentially one of the most socially explosive developments of our time. This book presents a current assessment of this rapidly evolving field, offering principles for actions and research and recommendations on key issues in genetic testing and screening. Advantages of early genetic knowledge are balanced with issues associated with such knowledge: availability of treatment, privacy and discrimination, personal decision-making, public health objectives, cost, and more. Among the important issues covered: Quality control in genetic testing. Appropriate roles for public agencies, private health practitioners, and laboratories. Value-neutral education and counseling for persons considering testing. Use of test results in insurance, employment, and other settings.

Linkages in the Landscape - Andrew F. Bennett 2003

The loss and fragmentation of natural habitats is one of the major issues in wildlife management and conservation. Habitat "corridors" are sometimes proposed as an important element within a conservation strategy. Examples are given of corridors both as pathways and as habitats in their own right. Includes detailed reviews of principles relevant to the design and management of corridors, their place in regional approaches to conservation planning, and recommendations for research and management.
