**Decolonizing Pathways towards Integrative Healing in Social Work** - Kris Clarke  
2020-10-01

Taking a new and innovative angle on social work, this book seeks to remedy the lack of holistic perspectives currently used in Western social work practice by exploring Indigenous and other culturally diverse understandings and experiences of healing. This book examines six core areas of healing through a holistic lens that is grounded in a decolonizing perspective. Situating integrative healing within social work education and theory, the book takes an interdisciplinary approach, drawing from social memory and historical trauma, contemplative traditions, storytelling, healing literatures, integrative health, and the traditional environmental knowledge of Indigenous Peoples. In exploring issues of water, creative expression, movement, contemplation, animals, and the natural world in relation to social work practice, the book will appeal to all scholars, practitioners, and community members interested in decolonization and Indigenous studies.

**Human Resources For Health In Europe** - Dubois, Carl-Ardy 2005-12-01

This book analyses how the current regulatory processes and practices related to key aspects of the management of the health professions may facilitate or inhibit the development of effective

responses to challenges facing health care systems in Europe. The authors document how health care systems in Europe are confronting existing challenges in relation to the health workforce and identify the strategies that are likely to be most effective in optimizing the management of health professionals in the future.

**Purity and Danger** - Professor Mary Douglas  
2013-06-17

*Purity and Danger* is acknowledged as a modern masterpiece of anthropology. It is widely cited in non-anthropological works and gave rise to a body of application, rebuttal and development within anthropology. In 1995 the book was included among the Times Literary Supplement's hundred most influential non-fiction works since WWII. Incorporating the philosophy of religion and science and a generally holistic approach to classification, Douglas demonstrates the relevance of anthropological enquiries to an audience outside her immediate academic circle. She offers an approach to understanding rules of purity by examining what is considered unclean in various cultures. She sheds light on the symbolism of what is considered clean and dirty in relation to order in secular and religious, modern and primitive life.

□□□□□□□□ - 2005

**A New Map for Relationships** - Martin E. . Hellman 2016-08-20

Dorothie and Martin Hellman reveal the secrets that allowed them to transform an almost failed marriage into one where they reclaimed the true love that they felt when they first met fifty years ago. Surprisingly, they found that working on interpersonal and international challenges at the same time accelerated progress on both.

**British Book News** - 1978

A Harvard Death, and Other Stories - Randy A. Birken 2006

The ten stories in this collection, written by a medical doctor, all focus on the medical profession, where the main character is either a medical student, hospital house officer, or doctor. As we know, becoming a doctor is often a seven-to-ten year period of hard work, long hours, and the need for the emotional fortitude to survive a punishing system. Along the way, doctors-in-training face many unforeseen, challenging and provocative situations. Perhaps Oscar Wilde said it best: "Experience is one thing you can't get for nothing." These stories reflect the author's many medical experiences which are woven into these writings, giving a richness and diversity to the plots, and each ending with a little twist. The title story, "A Harvard Death," is recognized in the medical community as a person who dies in an academic institution, and yet is a moving testament to the healing power of personal connection between physician and patient. Each story invites the reader to another medical setting as another mini-drama unfolds, or another ethical issue unwinds, or someone faces an ultimate decision, until the final suspenseful "whodunit" story of mystery and intrigue, "Not Always Benign." Blending pathos and humor with a medical background - much like television episodes of medical drama - Dr. Birken offers these intriguing vignettes with a comment from Bernard Malamud, "life is tragedy full of joy." Such are these stories. Endorsements "A Harvard Death is compelling in its portrayal of how medical school changes the lives of men and women who choose this honorable profession despite the vagaries of managed care today. His stories, albeit composites of fictional characters, ring true today given medical ethics, dying with dignity, and medical advances that continue to chip away at the doctor-patient relationship. I was especially taken with his first chapter and portrayal of Mr. D'Amato, who chose to die on his own terms. This resonated inside my gut as I watched my mother make the same decision last year in a Houston hospital, and the compassion of her doctors and nurses after five years of end-stage emphysema. Kudos to Dr. Birken for his compassion and psychological insights which are rare among physicians and surgeons today." Dr. Keith Barton, psychologist and author "In his diverse collection of stories about the

experiences of medical students, Dr. Randy Birken writes with skill and compassion. The more the young doctors discover the humanity of their patients, the more readers appreciate the humanity of those who choose to practice the art of healing." Rosemary Poole-Carter, playwright & novelist ([www.poole-carter.info](http://www.poole-carter.info)) "Steeped in the rich tradition of literature and medicine, Dr. Birken writes stories that unflinchingly explore the feelings that accompany the process of becoming a physician: fear and self-doubt, disillusionment and anger, and finally, compassion and confidence. For anyone who wants to understand how doctors really experience their training as it unfolds in the classroom and then in clinical settings, A Harvard Death is a must-read." Cheryl A. Koski, Ph.D., Professor of Writing about Health and Medicine, University of South Florida St. Petersburg

**The Presentation of Self in Everyday Life** - Erving Goffman 2021-09-29

A notable contribution to our understanding of ourselves. This book explores the realm of human behavior in social situations and the way that we appear to others. Dr. Goffman uses the metaphor of theatrical performance as a framework. Each person in everyday social intercourse presents himself and his activity to others, attempts to guide and control the impressions they form of him, and employs certain techniques in order to sustain his performance, just as an actor presents a character to an audience. The discussions of these social techniques offered here are based upon detailed research and observation of social customs in many regions.

Selection of Recent Books Published in Great Britain 1940-Apr. 1941 - 1978

*The Divided Self* - R. Laing 2010-01-28

First published in 1960, this watershed work aimed to make madness comprehensible, and in doing so revolutionized the way we perceive mental illness. Using case studies of patients he had worked with, psychiatrist R. D. Laing argued that psychosis is not a medical condition but an outcome of the ♦divided self♦, or the tension between the two personas within us: one our authentic, private identity, and the other the false, ♦sane♦ self that we present to the world.

**The Handbook of Art Therapy** - Caroline Case  
2013-01-11

It provides a comprehensive introduction to the field of art therapy in a variety of different settings.

Hypnotic Writing - Joe Vitale 2006-12-22

Discover the secrets of written persuasion! "The principles of hypnosis, when applied to copywriting, add a new spin to selling. Joe Vitale has taken hypnotic words to set the perfect sales environment and then shows us how to use those words to motivate a prospect to take the action you want. This is truly a new and effective approach to copywriting, which I strongly recommend you learn. It's pure genius." -Joseph Sugarman, author of Triggers "I've read countless book on persuasion, but none come close to this one in showing you exactly how to put your readers into a buying trance that makes whatever you are offering them irresistible." -

David Garfinkel, author of Advertising Headlines That Make You Rich "I am a huge fan of Vitale and his books, and Hypnotic Writing (first published more than twenty years ago), is my absolute favorite. Updated with additional text and fresh examples, especially from e-mail writing, Joe's specialty, Hypnotic Writing is the most important book on copywriting (yes, that's really what it is about) to be published in this century. Read it. It will make you a better copywriter, period." -Bob Bly, copywriter and author of The Copywriter's Handbook "I couldn't put this book down. It's eye opening and filled with genuinely new stuff about writing and persuading better. And it communicates it brilliantly and teaches it brilliantly-exemplifying the techniques by the writing of the book itself as you go along." -David Deutsch, author of Think Inside the Box, [www.thinkinginside.com](http://www.thinkinginside.com) "Hypnotic Writing is packed with so much great information it's hard to know where to start. The insights, strategies, and tactics in the book are easy to apply yet deliver one heck of a punch. And in case there's any question how to apply them, the before-and-after case studies drive the points home like nothing else can. Hypnotic Writing is not just about hypnotic writing. It is hypnotic writing. On the count of three, you're going to love it. Just watch and see." -Blair Warren, author of The Forbidden Keys to Persuasion
