Variant Lifestyles and Relationships Bram Buunk

Relating Leslie A. Baxter 1996-05-17 Drawing upon the dialogism of social theorist Mikhail Bakhtin, the authors re-conceive the core ideas of interpersonal communication - relationship development; closeness; certainty; openness; communication competence; and the boundaries between self, relationship, and society.

Family Ties and Aging Ingrid Arnet Connidis 2001-06-19 "At last: a book that melds research on family ties in later life inclusively. Connidis' book is not simply a research compendium but a theoretical synthesis of value to both scholars and students. Connidis' clear writing style makes it an excellent choice for students... I recommend this book both to teachers and researchers in the areas of family and aging." -- JOURNAL OF MARRIAGE AND THE FAMILY Presenting a broad examination of the issues surrounding family ties and aging, this advances textbook provides an integrated and thorough representation of current research in the field. Whereas book on families and aging have traditionally focused on ties to a spouse and to children and grandchildren, Connidis's coverage is more extensive and more reflective of contemporary society. She includes groups and relationships that have typically been neglected, such as single, divorced, and childless older people and their family relationships, as well as sibling relationships among the elderly, live-in partnerships not formalized by marriage, and the family ties forged by gays and lesbians over their life course. Family Ties and Aging weaves the vast range of information we now have about the many facets of family relationships and aging into a critical, comprehensive, and integrated whole.

The Women's Advocate 1991

Sourcebook of Family Theories and Methods Pauline Boss 2008-11-19 Origins We call this book on theoretical orientations and methodological strategies in family studies a sourcebook because it details the social and personal roots (i.e., sources) from which these orientations and strategies flow. Thus, an appropriate way to preface this book is to talk first of its roots, its beginnings. In the mid 1980s there emerged in some quarters the sense that it was time for family studies to take stock of itself. A goal was thus set to write a book that, like Janus, would face both backward and forward a book that would give readers both a perspective on the past and a map for the future. There were precedents for such a project: The Handbook of Marriage and the Family edited by Harold Christensen and published in 1964; the two Contemporary Theories about the Family volumes edited by Wesley Burr, Reuben Hill, F. Ivan Nye, and Ira Reiss, published in 1979; and the Handbook of Marriage and the Family edited by Marvin Sussman and Suzanne Steinmetz, then in production.

The Family J. Ross Eshleman 1978

The State of Affairs Jean Duncombe 2014-04-08 This volume brings together contributions on the study of sexual affairs in committed personal relationships. The editors enlisted colleagues with varied theoretical and methodological perspectives from Britain, the United States, and other countries. Together, their contributions provide a broad, cross-national perspective on affairs. Grounded in theoretical discussion, the chapters in this book introduce data collected by a broad range of methods, including attitude surveys, large statistical cohort studies, case studies, depth interviews, and group discussions. A number of contributors locate the theoretical discussion of affairs within the broader contemporary ordering of committed relationships, contrasting the liberating and empowering aspects of affairs with the damage they may inflict on society as a whole and on the lives of individuals and families. The themes of passion, transgression, secrecy, lies, betrayal, and gossip are common to a range of chapters throughout. The volume provides broad literature reviews and theoretical discussions concerning particular aspects of affairs, such as

communication and jealousy. In addition, case studies are used for the more detailed exploration of heterosexual affairs and contemporary developments in gay male and lesbian relationships. The State of Affairs will be of interest to researchers, scholars, and students in social psychology; communication; sociology; family, social, and clinical psychology; and for practitioners in couple counseling.

The Lifestyle Odyssey Research Alert 1992 Here are the facts behind the social, personal and cultural changes touching each of our lives, from the way we eat our cookies to our desire for a better world. The book examines the subtle forces at work and paints a vivid picture of the many new American lifestyles.

Variant Lifestyles and Relationships Abraham P Buunk 1989-07-01 The authors of this book present an overview of the most significant research on various forms of intimate relationships, including singlehood, non-marital cohabitation, gay and lesbian relationships, extramarital relationships and communal living. The authors focus mainly on empirical findings from sociology and social psychology but also include historical and ethnographic material to illustrate that variant lifestyles are not as new as is often assumed. Review questions, exercises, and a lengthy bibliography make this book an excellent teaching tool for undergraduate and beginning graduate courses.

What Men Say, What Women Hear Linda Papadopoulos 2008-12-30 An indispensable relationship guide for every woman who has ever told her partner, "Really, don't go to any trouble for my birthday"...And then been disappointed when he didn't. He says: "That dress looks great! Let's buy it!" You hear: "He really loves being with me. I feel as though we've truly bonded." He means: "For the love of God, the last eight black dresses you tried on looked identical! Just buy one, so we can get home in time for the game!" In *What Men Say, What Women Hear*, Dr. Linda Papadopoulos tackles the saying, hearing, and listening gap between men and women that can complicate every step of a relationship, from first dates and first sex to meeting the parents and living happily ever after. An expert on Cognitive Behavior Therapy, which connects people's initial and often misguided perception of something to the emotional reaction that follows, Dr. Linda deconstructs the common thinking errors that can hinder communication—such as personalizing everything ("He's in a bad mood. Clearly he's thinking of a way to dump me.") and jumping to conclusions ("He asked how much younger my sister is than me. I bet he thinks I look like an old bat compared to her."). By applying clinical techniques to fun—and oh-so-familiar—examples, Dr. Linda helps readers eliminate unnecessary relationship anxiety and reevaluate the way they think about themselves, their partners, and the world around them.

The Social Psychology of Attraction and Romantic Relationships Madeleine A. Fugère 2017-09-16 Why are we attracted to some people and not to others? Are first impressions accurate? Why do some romantic relationships succeed while others fail? Are our romantic choices influenced by evolution? In tackling questions like these, *The Social Psychology of Attraction and Romantic Relationships* reviews the theory and research behind this fascinating area. It combines real-life anecdotes and popular media examples with the latest psychological studies, making it a lively and engaging read. Ideal for students of social psychology and intimate relationships courses, this is a comprehensive introduction to an everyday subject that, on closer investigation, proves to be a dynamic, intriguing, and sometimes surprising area.

Handbook of Marriage and the Family Marvin B. Sussman 2013-06-29 In a thoroughgoing revision of the first edition of this classic text and reference, published by Plenum in 1987, the editors have assembled a distinguished group of contributors to address such topics as past, present, and future perspectives on family diversity; theory and methods of the family; changing family patterns and roles; the family and other institutions; and family dynamics and processes.

Social Communication in Advertising William Leiss 1990 Now available in a significantly updated second edition featuring two new chapters, *Social Communication in Advertising* remains the most comprehensive historical study of advertising and its function within contemporary society. It traces advertising's influence within three key social domains: the new commodities industry; popular culture; and the mass media which manages the constellation of images that unifies all three.

Subject Guide to Books in Print 1993

Social Psychology Richard Gross 2016-02-04 In everyday life we depend upon, interact with, influence are influenced by many people in situations that range from brief single encounters to the special relationships we form with family and close friends. Social interactions such as these are just a part of what make up social psychology, the study of human social behaviour and thought. In 'Social Psychology', the authors have incorporated the most recent theoretical developments and research findings and accounted for more than a decade of growth and expansion in the discipline since the publication of Pennington's 'Essential Social Psychology' (from which this book is descended). The result is a wholly fresh textbook that provides a clear and readable introduction to this empirical discipline. Assuming no prior knowledge, this book guides the reader through the main topic areas, providing insights into the key theories, concepts, research and debates that define the field. Particular attention is paid to how research is applied, with each chapter containing a section demonstrating the application of social psychological findings in the contexts of education, law, health and organisations. A summary of the main points and suggestions for further reading are included at the end of each chapter. There are figures, tables and photographs provided throughout to encourage visualisation and aid understanding.

Odyssey of the Heart John H. Harvey 2001-11 Written in a personal, story-telling style, Odyssey weaves excerpts of actual relationships with current and classic research to provide a better perspective on our own experiences in light of the principles of relationships. Highlights of its comprehensive coverage include the classic research on personal attraction, dating and meeting others for closeness, and the maintenance and dissolution of relationships. "Recommendations for Growth" provides an opportunity for readers to directly apply current research and theory to their own relationships. Features new to this edition include the latest research and therapeutic techniques on maintaining and enhancing relationships; a new chapter on the family with recent demographic changes and a look at the ongoing debates about the impact of cohabitation, divorce, and blended families; and new chapters on same sex relationships and the dark side of relationships, including why women stay in abusive relationships. Odyssey of the Heart serves as a text for courses on close and/or interpersonal relationships. Its accessibility and inclusion of many actual experiences will engage the general reader.

Social Work 1991

Sexuality in Close Relationships Kathleen McKinney 2014-05-22 This is one of the first volumes to examine the interface between research undertaken in sexuality and that in close relationships from a social psychological perspective. Experts from several different disciplines offer chapters that contain theory, extant literature, and their own original research on such topics as jealousy, extradyadic sexuality, communication, love, and sexual coercion. Aimed at a fairly wide audience, this book will be of interest to students, faculty, and other professionals in social psychology, sociology, communication, and family and women's studies. It is also a valuable source of information for teachers, researchers, and clinicians working in the areas of human sexuality and/or close relationships.

The Impact of Changing Lifestyles on a Family Service Agency 1976 This article examines the need for the modernization of current practices in Jewish family agencies. The author suggests that Jewish agency staff often allow their own personal values to interfere with assisting clients. To help eradicate certain biases in Jewish agency staff, the author creates a seminar that focuses on three major areas: the effect on practices of changing social patterns; workers' values regarding variant lifestyles; and an agency's need and readiness to change its image in the Jewish community. The author looks at casework dealing with marriage problems, divorce rates, cohabitative relationships and homosexual relationships. In *Journal of Jewish Communal Service*, 52:3.

The Psychology of Jealousy and Envy Peter Salovey 1991-02-15 After decades of banishment to popular magazines and advice columns, jealousy and envy have emerged as legitimate topics of scientific inquiry. This volume includes chapters from nearly every major contributor to the

psychological literature in this area. Lesbian Health Institute of Medicine 1999-06-11 Women's health, as a field of study, is a developing discipline. Health theories in general have been based on studies of men. However, in recent years, more attention has shifted to women's health, realizing the disparities between men and women in relation to their health. During the last two decades, a similar shift has occurred for a group of women—lesbian women—to further identify and specify their health needs. Over the past decade, lesbians have organized to call for attention to the health issues of this community, resulting in several federally funded research initiatives. This book offers a comprehensive view of what is known about lesbian health needs and what questions need further investigation, including: How do we define who is lesbian? Are there unique health issues for lesbians? Are lesbians at higher or lower risk for such health problems as AIDS, sexually transmitted diseases, breast cancer, mental disorders, and substance abuse? How does homophobia affect lesbian health and the funding of research on lesbian health? How do lesbian health needs fit into the health care system and the larger society? What risk and protective factors shape the physical and mental health of lesbians? The book discusses how to determine which questions to ask about sexual orientation, the need to obtain information without violating privacy, the importance of considering racial and ethnic diversity in the study of lesbians, strategies for exchanging information among researchers and disseminating findings to the public, and mechanisms for supporting greater numbers of researchers. Lesbian Health takes a frank look at the political pressures, community attitudes, and professional concerns uniquely affecting the study of lesbian health issues. The book explores many other issues including the potential for transferring findings in this field to other population groups, including other rare populations and women in general.

Feeling Hurt in Close Relationships Anita L. Vangelisti 2009-07-31 Feeling Hurt in Close Relationships presents a synthesis of cutting-edge research and theory on hurt. Being hurt is an inevitable part of close relationships. What varies from relationship to relationship is not whether partners hurt each other, but how their relationship is affected by hurtful episodes. Given the potential influence of hurt feelings on people's interpersonal relationships, it is not surprising that scholars have begun to study the antecedents, processes, and outcomes associated with hurt. This collection integrates the various issues addressed by researchers, theorists, and practitioners who study the causes of hurt feelings, the interpersonal events associated with hurt, and the ways people respond to hurting and being hurt by others. To capture the breadth and depth of the literature in this area, the work of scholars from a variety of disciplines - including social psychology, communication, sociology, and family studies - is highlighted.

Under-Studied Relationships Julia T. Wood 1995-04-17 A full understanding of relationship processes must include consideration of theoretically inconvenient and/or socially disfavored instances as well as those whose value and importance, traditionally, have been acknowledged in research. "Moving off the beaten track," Under-Studied Relationships begins to rectify existing scholarship's tendency to ignore the diverse and emergent forms of relationships that are increasingly evident in modern society. Editors Julia T. Wood and Steve Duck have gathered together outstanding researchers in the field to discuss such largely overlooked issues as long-lasting marriages, cultural-minority relationships, lesbian/gay relationships, simultaneous hierarchical and friendships at work, nonmarital cohabitation, long-distance relationships, and personal relationships over computer networks.

Handbook of Marriage and the Family Suzanne K. Steinmetz 2013-11-11 The lucid, straightforward Preface of this Handbook by the two editors and the comprehensive perspectives offered in the Introduction by one of them leave little for a Foreword to add. It is therefore limited to two relevant but not intrinsically related points vis-a-vis research on marriage and the family in the interval since the first Handbook (Christensen, 1964) appeared, namely: the impact on this research of the politicization of the New Right! and of the Feminist Enlightenment beginning in the mid-sixties, about the time of the first Handbook. In the late 1930s Willard Waller noted: "Fifty years or more ago about 1890, most people had the greatest respect for the institution called the family and wished to learn nothing whatever about it. . . . Everything that concerned the life of men and women and their children was shrouded from the light. Today much of that has been changed. Gone is the concealment of the way in which life begins, gone the irrational sanctity of the home. The aura of sentiment which once protected the family from discussion clings to it no more We want to learn as much about it as we can and to understand it as thoroughly as possible, for there is a rising recognition in America that vast numbers of its families are sick-from internal frustrations and from external buffeting. We are engaged in the process of reconstructing our family institutions through criticism and discussion" (1938, pp. 3-4).
